

## ABSTRACT

**Siti Rosidatul Mahmuda, NIM. 211 408 034.** “The influence of family social life situation on student’s learning motivation. A study on SMP Negeri 3 Wonosari sub-district, district of Boalemo. Economy education department, office economy study program.year 2012. It is supervised by Supardi Nani, SE., M.Si as the principal supervisor and Abdul, SE., M.Si as the co-supervisor.

This study aimed to find the influence of family social economy life on student’s learning motivation in SMP Negeri 3 Wonosari. There were 30 samples involved in this research for 3 months of data collection process. The current research used quantitative method. Questionnaire, interview, and observation were used to collect the data needed. It can be seen the regression  $Y = 21,01 + 0,61X$  and  $t\text{-count} > t\text{-list} (8,5 > 2,76)$ , which means positive and significant effects between family social life situation and student’s learning motivation.

Keywords: *family social life situation and student’s learning motivation.*
