CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

Based on the research finding in chapter four, the result can be concluded as follows:

Movie is kind of literary work that really interesting to analyze. Kungfu Panda is one of the many movie in the world. Kungfu Panda describes many moral values and social problem in human life. Spesifically it describes moral value from character through its characterization. I formulated that moral values is divided into five aspects. Those are, self confident, wise, willing, arrogance, and ambitious.

Self confident, by seeing the movie, it can be conclude that self confident is very important for every human. For those who has self confident always thinks positive toward themselves. They have strong confidence. People who have self-confidence is the one who knows that he/she capable of doing what he/she wanted.

In addition to self confident, there is also wise in judging moral values. It can be conclude by wise character can can create something better. Everything is a process. Always be grateful for what you have today. What looks good today, does not mean that it is good for tomorrow. So, think wisely for everything in

every situation. In this case by Wise character of master shivu and oogway can make Po become a dragon warrior.

Willing is the third moral value. It can be conclude that by have a willing someone become more better. We can be anything we want to be, and we can do anything we want to do if we have willing and effort. Besides, we need other people help. Without helps from others we can not achieve something.

From Tai Lung character, it can be conclude that by having an arrogant and ambitious character can make someone become bad. Arrogant will make us lost of self control, and it only brings failure. As well as the ambitious person, they will do anything to achieve what they want without seeing to the reality anymore. To achieve their dreams, they will make anything become legal. At last, to achieve the goal, we do not have to be ambitious. Because if we expect too much and we fail it will hurts us a lot.

5.2 Suggestion

After I conclude the result of the analysis, I would like to carry on some suggestions to the reader. They are:

Literary works are not something that boring, but it is something which is really interesting to analyze. I suggested the readers to be more attracted to analyze literary work, because literary work is concerned with life and its problem which we often see in our daily life. From there, we can learn how to solve the problem wisely.

Movie can be the media in order to get something positive such as moral value in animated movie. Based on the conclusion above, it can be found many moral values. So, it can be suggested to the next researcher to use movie as the media of the researcher.

By reading this analysis about the moral value in Kungfu Panda movie through their character and characterization, we can learn how to develop our own attitude and behavior to society. Also, I hope we can be more appreciate to literary works.
