

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

Based on discussion in the result of research, it can take some conclusion as follow:

1. Comic strip is one alternative media that can use in teaching process at eight grade of SMP Negeri 8 Kota Gorontalo, and this media can improve students' vocabulary mastery.
2. In pre-test the total of the students score is 582 with the mean score 19,4. It is showed that the students' vocabulary mastery is low. After giving the post-test the total of the students score is 697 with the mean score 23. It is showed that the students' vocabulary was increase about 4% after giving the treatment.
3. The normality analysis of pre-test and post-test data, I found the pre-test and post-test data is distributed normally. It supported by the result analysis of each test. In the pre-test and post-test I found each L_{count} is smaller than L_{list} ($L_{count} \leq L_{list}$). For pre-test, the L_{count}

is 0,0652 and the L_{list} is 0,161. Similarly, for post-test L_{count} is 0,0691 and the L_{list} 0,161.

4. After analyzing the data by using t-test at the level of significant $\alpha=0,05$, is got t_{count} is -4,51, while the value of t_{list} is 0,171. The criterion is if if $t_{count} \leq t_{list}$ it means H_0 received, but if $t_{count} \geq t_{list}$ it means H_1 was received. It show that the data was $t_{count} = -4,51 \geq t_{list} = 0,171$. It can be conclude the hypothesis acceptable.

2. Suggestion

Based on conclusion above, I would like to give suggestion as follows:

1. I suggest to the English teacher to use media in improving students' ability in mastering vocabulary. In order to come up the students' interest and to motivate them in studying English.
2. In using media comic strip, teacher should have well preparation for the materials, assignments, and another activity, which is appropriate with the time allocation.
3. The students need enjoyable space for study English as foreign language especially vocabulary. We should make interesting way to teach English such use media to stimulate students' brain in learning.

4. For further research, this research can be developed to some other component of English.

5. I aware this research has many weaknesses. So, I hope the next researcher that interest of this topic, took another part of language to improve.
