

ABSTRACT

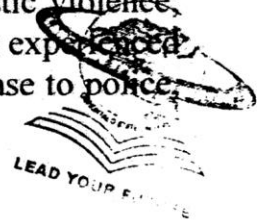

Fadlun Alkatiri. "Divorce in Gorontalo City (A Case Study of Domestic Violence). The principal supervisor was Maisara Sunge, and the co-supervisor was Sarson M. Wantu. This research aimed to observe and to find out the divorce rate connected with domestic violence which was viewed from juridical aspects and influential factors on that issue.

It used qualitative approach meant that the finding of research analyzed without statistical procedure. This could reveal the unknown phenomenon. The method used was qualitative method and the data collected through observation, interview and documentation.

The problem was how the juridical observation of divorce in Gorontalo city was. The aimed of research was to examine juridical observation and to explain the factors of divorce. The method used was qualitative method which described research result by empirical data from the field.

The research showed that the cause of divorce in Gorontalo city was lack of religious knowledge and lack of understanding on law about domestic violence; this was clear from the arguments above. In this context, women who experienced domestic violence and ended by divorcing should had reported the case to police; thus, law process could be implemented well.
