

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

5.1 Conclusions

By looking the data analysis as described in chapter IV I would like to take conclusion,

Interest plays an important thing, because interest are the sources of motivation which drive people to do, what they want to do when they are free to choose. The students' interest in learning English can be influenced by some factors; they are internal factors and external factor. In internal factor such as the students ability and media. In this case, ability related to students knowledge and not all students have the same ability. There are students who have good speaking ability in front of the class, while others not. The teacher, and material as the part of external factor. If the teacher can use method in good way and also can make the students understand about the material, it is obviously can make the student enjoy the lesson.

5.2 Suggestions

In this research, I would like to give suggestion,

After being able to develop the students' interest teacher should also able to increase their interest. In the effort to generate students' interest, teacher should create the good atmosphere of learning such as a lead a relax situation avoid the students' bored. For academic purpose, I want to inspire others to conduct about student's interest. On the other field of research.
