

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

5.1 Conclusions

Based on the explanation on research finding and discussion, the researcher can take some conclusions of this research as follows:

1. CIRC method can be used teaching reading. This method gives significant influences to increase the students' ability in reading text especially in identifying generic structure of narrative text.
2. From the result of the research, the researcher found that there are differences score between the students' ability in indicators of reading comprehension in pre-test and post test. It can be proofed with the average of students' score in reading text by using CIRC method. Where the average of the students' score in post test higher than pre-test.
3. The hypothesis verification in this research was acceptable where t_{count} more than t_{list} , the researcher found that t_{count} was 5.13 and t_{list} was 2.024 with the similarity level namely df was 38 and level significant $= 0.05$. So, it can be conclude that $t_{count} > t_{list}$ or 5.13 > 2.024. It means that the hypothesis can be accepted or in the other words, the students' ability in reading effectively developed by using CIRC method.

5.2 Suggestions

Based on the conclusion above, the researcher has some suggestions as follows:

1. In teaching process, the students and the teacher are the main factor that can aim the purpose of teaching and learning. The teacher have to create the effective and creative method of teaching in teaching proses to make the students interesting in English and to enable the students' receiving the materials. Moreover, the application of CIRC method is the one of useful thing to teach the students.
2. In this case, the CIRC method as the one of cooperative learning to teaching English. It helps the teacher to deliver the material and also helps the students to understand the material easier.
3. To the other researcher, they are suggested to apply CIRC method in writing. CIRC method is defined to beome continues method in encouranging learning and taeching process, so it should be more deeply investigated related to the application for teaching writing.
