

## **Abstract**

Farizka Humolungo (2013): "Analyzing Passive Sentences through Semantic Role Analysis"

This research objectives are: first, providing a source of information for the new linguists or young linguists to study about Semantic deep and passive construction. It is very useful for the new coming linguists to know that linguistics field of study is dynamic and undergoes changes and that is why the old common pattern may not fit to some kind of sentences, next, to find out what roles mostly found in data findings, and what kind of passive sentences dominantly occurred based on two different sources.
