ABSTRACT

Sutrisno Nusi. Portal PKM-UNG. The Final Project of Study Program of Informatics Management. Department of Informatics Engineering. Faculty of Engineering. Universitas Negeri Gorontalo. 2014.

The research aimed to learn and analyze the system in PKM-UNG and make a new system that was online computer-based system to help and handle the problem in PKM-UNG such as; (1) the lack of information that had been given to the students; (2) the difficulty of classifying the types of PKM proposal that was done by secretariat; (3) filing non-digital proposal to optimize the work process in PKM-UNG.

The stages of research were preparation, observation, interview, data collection, problem identification, system design, and Portal PKM-UNG application made which could operate the data recording of PKM and PMW proposal, download the clinic file and make the PKM report.

The research result showed that Portal PKM-UNG could give the information quickly and accurately and could be accessed any time by the students, reviewer, and administrator of PKM-UNG. Hence, the Portal PKM-UNG could be implemented to PKM (The center of students' activity) UNG, and it also helps the students to cut down the cost for hard copy file.

Keywords: Portal, Proposal, PKM-UNG.
