This research was to measure the influence of the implementation of regional management information system (SIMDA) towards the quality of financial report of government of Bone Bolango district. The primary research data were collected through questionnaire. Research sample were 1 head of financial division, 1 person from financial sub-division, 1 person from treasury sub-division, and 1 person from accounting sub-division. Research data were analyzed through simple linear regression analysis.

Research result showed that the regional management information system (SIMDA) significantly affected the quality of financial report of government of Bone Bolango district. The result of analysis showed that the determinant coefficient R^2 was 0.431. It meant that 43.1% of the quality of financial report of Bone Bolango district affected by the regional management information system (SIMDA).

Keywords: **Regional Management Information System (SIMDA) of Financial Report**
