CHAPTER V

CONCLUSIONS AND SUGGESTIONS

Conclusions

Based on the research finding and discussion of the data anlysis, the researcher make some conclusion as follows:

Firstly, vocabulary is one of components in language that can support students in mastering English skills well; they are listening, speaking, reading and writing.

Secondly, based on the explanation in the previous chapter, one media that can be used to increase students' English vocabulary is word list card. Word list card is considered as a good way to teach vocabulary because it can help students to understand the meaning of word and also it helps them to memorize the words. It is proved by seeing the last score of this research or the students' post-test score is higher than the pre-test score, which is the score of post-test was 318 and the score of pre-test only 245. So, the students' English vocabulary was increase after applying word list card.

The last is the hypothesis of this research is accepted. The hypothesis of this research is "Word list card can increase students English vocabulary of fifth grade students of SDN 56 Gorontalo city". It is showed by the hypothesis verification testing that $8,56 > 2, 00$ ($t_{count} > t_{list}$). Therefore H_0 was rejected and H_a was accepted. It is indicated that word list card can increase students' English vocabulary significantly.

Suggestions

Based on the conclusion above, the researcher have some suggestion as follows:

Firstly, for the students, especially for the fifth grade students of SDN 56 Gorontalo city. This study may become reference for them who are interested in learning vocabulary.

Secondly, for the teachers, It is suggested that English teacher may use "word list card" as media in order to the students' vocabulary can be increased.
