ABSTRACT

Kidamu, Hasrul. 2014. Factors Influencing the Selection of Intra Uterine Device (IUD) Contraception of KB Acceptor at Puskesmas Global Telaga, Gorontalo District. Skripsi, Department of Nursing, Faculty of Health and Sport Sciences, Universitas Negeri Gorontalo. The principal supervisor is Zuhriana K. Yusuf, and the co-supervisor is Rhein Djunaid.

The population in Indonesia has been a problem, and IUD contraception is one of the long-term programs to overcome the population growth. Knowledge, husband involvement, and information media are able to influence the selection of IUD contraception. This research aims at investigating the influencing factors of selecting IUD contraception among KB acceptor at Puskesmas Global Telaga, Gorontalo district.

This is a descriptive research using population consist of 89 people and sample consist of 30 people taken by Purposive sampling. The data analysis is by Univariat analysis.

The result concludes that the influencing factors in selecting IUD contraception were knowledge (93.3%), husband involvement (83.3%), and information media (73.3%).

The conclusion of this research is that the KB acceptor at Puskesmas Global Telaga, Gorontalo district have had enough knowledge on the contraception, involving the husbands in the selection, and had been used the information media in selecting the IUD contraception. It is suggested to improve the socialization on selecting the contraception in order to develop the number of KB acceptor.

Keywords: *Influencing Factors of Acceptor, IUD Contraception*
