

## ABSTRACT

**Mohamad Adi Wiratno. 841 410 132. 2014. The Relationship between Family Support and Adherence of CKD Patient in Doing Hemodialysis Therapy at Hemodialysis Instalation of Prof. Dr. H. Aloe Saboe Gorontalo City Hospital. It was supervised by Rini Fahriani Zees and Edwina Monayo, M.Biomed.**

The research aimed at investigating whether there was a relationship between family support and adherence of CKD patient in doing hemodialysis therapy at Aloe Saboe Hospital.

The research was conducted in Prof. Dr. H. Aloe Saboe Gorontalo City Hospital during three months; from may 2014 to June 2014. The research applied questionnaire and interview as method of research. The data of research consisted of primary and secondary data. In this research, the data were being analyzed in descriptive statistical way by applying SPSS for Windows version 16,0.

The research result showed that there were 20 of 30 respondents (66,7%) who had lack of family support and were not obidient in doing hemodialysis therapy. Thus, it could be concluded that there was a relationship between patient's adherence in doing hemodialysis therapy with  $P Value=0.000$ , ( $\alpha=0.05$ ).
