

ABSTRAK

Adriana Novyanti SF, Badalu, 2014. Faktor-Faktor Yang Berhubungan Dengan Kesiapan Toilet Training Di Desa Lauwonu Kecamatan Tilango Kabupaten Gorontalo. Skripsi, jurusan IlmuKeperawatan, Fakultas Ilmu-Ilmu Kesehatan dan Keolahragaan, Universitas Negeri Gorontalo, Pembimbing I **dr.Zuhriana K.Yusuf,M.kes** dan Pembimbing II **Ns. Rhein Djunaid, S.Kep, M.Kes.**

Toilet training merupakan salah satu tugas utama dalam tahap perkembangan *toddler* (1-3 tahun). *Toilet training* pada anak merupakan suatu usaha untuk melatih anak agar mampu mengontrol dalam melakukan buang air besar dan buang air kecil. Penelitian bertujuan untuk menganalisis hubungan antara pengetahuan ibu, lingkungan dan minat anak terhadap kesiapan toilet training pada anak.

Penelitian ini menggunakan desain *cross sectional*. Populasi penelitian adalah seluruh ibu yang mempunyai anak usia *toddler*, sampel pada penelitian ini berjumlah 35 orang. Analisis yang digunakan adalah Univariat dan Bivariat menggunakan Uji *Chi-Square*.

Hasil penelitian didapatkan bahwa ada hubungan antara pengetahuan ibu, dengan kesiapan toilet training pada anak usia *toddler* dengan nilai $Pvalue=0,00$ yaitu sebanyak 19 responden. Ada hubungan lingkungan dengan kesiapan toilet training pada anak usia *toddler* dengan nilai $Pvalue=0,01$ yaitu sebanyak 24 responden. Ada hubungan antara minat anak dengan kesiapan toilet training pada anak usia *toddler* dengan nilai $Pvalue=0,04$ yaitu sebanyak 18 responden.

Kesimpulan pengetahuan, lingkungan, dan minat anak mempunyai hubungan yang bermakna terhadap kesiapan toilet training. Saran bagi ibu yang mempunyai anak usia *toddler* yaitu ibu lebih memperbanyak informasi tentang *toilet training* dan bagi peneliti selanjutnya diharapkan dapat meneliti faktor-faktor lain tentang latihan *toilet training*.

Kata kunci : *toilet training, usia toddler*

ABSTRACT

Andriana Novyanti SF. Badalu, 2014. Factors Related to Toilet Training Readiness on Toddler at Lauwonu Village, Tilango Subdistrict, Gorontalo District 2014. Skripsi, Study Program of Nursing, Department of Nursing, Faculty of Health and Sport Sciences, Universitas Negeri Gorontalo. The principal supervisor was dr. Zuhriana K. Yusuf, M.Kes and the co-supervisor was Ns Rhein Djunaid, S.Kep, M.Kes.

Toilet Training is one of main duties on toddler (children aged 1-3 years) development stage. Toilet training is an effort in training children to be able to urinate and defecate. The research aimed at analyzing the relation between mother's knowledge, environment, and children's interest and toilet training readiness for children. The research applied cross sectional design. The population of research were all mothers who have toddlers, while the samples were 35 mothers. The data were analyzed through univariate and bivariate technique using chi-square test.

The research result showed that there was relation between mother's knowledge and toilet training readiness for children with $Pvalue=0,00$ (19 respondents), there was relation between environment and toilet training readiness for children with $Pvalue=0,01$ (24 respondents), and there was relation between children's interest and toilet training readiness for children with $Pvalue=0,04$ (18 respondents).

To conclude, there was relation of mother's knowledge, environment, and children's interest to toilet training readiness. It is suggested for mothers who have toddlers to gain information as much as possible related to toilet training, and for further researcher to research other factors related to toilet training.

Keywords: toilet training
