

ABSTRAK

Hendrik Prayitno Luawo. 2015. *Hubungan Beban Kerja Perawat Dengan Pelaksanaan Patient Safety Di Ruang Instalasi Bedah Sentral Di RSUD Prof. Dr. H. Aloe Saboe Kota Gorontalo.* Skripsi, Program Studi S1 Keperawatan Jurusan Keperawatan, Fakultas Ilmu – Ilmu Kesehatan dan Keolahragaan, Universitas Negeri Gorontalo. Pembimbing I Dra. Hj. Rany Hiola, M.Kes dan Pembimbing II Ahmad Aswad, S.Kep, Ns. MPH.

Beban kerja perawat pelaksana yang adekuat diperlukan agar perawat pelaksana dapat memberikan pelayanan yang sesuai dengan standar pelayanan keperawatan dan meminimalkan terjadinya masalah keselamatan pasien. Rumusan masalah dalam penelitian ini adalah apakah ada hubungan antara beban kerja perawat pelaksana dengan pelaksanaan *patient safety* di ruang instalasi bedah sentral RSUD Prof. Dr. H Aloe Saboe Kota Gorontalo. Penelitian ini bertujuan untuk mendapatkan gambaran tentang Hubungan Beban Kerja Perawat Dengan Pelaksanaan Patient Safety Di Ruang Instalasi Bedah Sentral Di RSUD Prof. Dr. H. Aloe Saboe Kota Gorontalo.

Penelitian ini menggunakan metode penelitian survey analitik dengan pendekatan *cross sectional*. Jumlah sampel sebanyak 22 responden dengan teknik pengambilan sampel yakni Sampel Jenuh. Instrumen penelitian yang digunakan adalah observasi dan kuesioner.

Hasil uji statistik diperoleh dengan menggunakan uji *Fisher exact* didapatkan hubungan yang bermakna artinya ada hubungan antara beban kerja dengan pelaksanaan *patient safety* ($p= 0,039$; $\alpha= 0,05$). Disarankan bidang keperawatan memonitoring, mengevaluasi dan menindak lanjuti secara terjadwal minimal setiap 1 bulan sekali pelaksanaan *patient safety* perawat terhadap pasien serta melakukan *supervise* minimal 2 minggu sekali untuk pelaksanaan *patient safety*.

Kata kunci : beban kerja perawat pelaksana, pelaksanaan *patient safety*.

ABSTRACT

Hendrik Prayitno Luawo. 2015. The Relationship between Nurse Workload and the Implementation of Patient Safety in Central Surgical Installation room at RSUD of Prof. Dr. H. Aloei Saboe, Gorontalo city. Skripsi, Study Program of S1 nursing, Department of Nursing, Faculty of Health and Sport Sciences, Universitas Negeri Gorontalo. The principal supervisor is Dra. Hj. Rany Hiola, M.Kes, and the co-supervisor is Ahmad Aswad, S.Kep, Ns. MPH.

The adequate nurse workload is important in giving proper services according to the nursing standard, and to minimize the problems might occur. The problem discussed in his research is if there is a relationship between nurse workload and the implementation of Patient Safety in central surgical installation room at RSUD of Prof. Dr. H. Aloei Saboe, Gorontalo city. This research aims at obtaining an overview of the relationship between nurse workload and the implementation of Patient Safety in central surgical installation room at RSUD of Prof. Dr. H. Aloei Saboe, Gorontalo city.

This is an analytic survey research and applies the cross sectional approach. The sample consists of 22 respondents taken by saturation sample technique, and the data is obtained by observation and questionnaire.

The result of statistical test using Fisher Exact test shows that there is a significant relationship between nurse workload and the implementation of patient safety ($p=0.039$; $\alpha=0.05$). It is recommendable for nursing division to monitor, evaluate, and follow up the patient safety according to the schedule at least once a month, and to supervise the implementation at least every two weeks.

Keywords: nurse workload, the implementation of Patient Safety
