

ABSTRACT

Mohammad Fahmy Djuma Puloli. The Information System of Internships and Skripsi at Information System Study Program, Universitas Negeri Gorontalo. Final Project at Informatics Management Study Program, Department of Informatics Engineering, Faculty of Engineering, Universitas Negeri Gorontalo 2014.

This research aims at analyzing the old system and designing the new integrated and structured system of the Internships and Skripsi at information system study program. The reasons are because of the lack of information presented by the system and also the trouble in arranging the name of supervisors, examiners and the schedule of seminar.

The technique of collecting the data was completed by observation and interview. Those processes are to identify the trouble in the system, to design the system, and to design the information system in processing the data of Internships and Skripsi by the use of PHP as the programming language.

The result shows that, by designing a new integrated system with database, the name of supervisors and examiner are equally arranged as well as the schedule of seminar. Therefore, the system is able to be used and developed.
