ABSTRACT

ISNAWATI ALI. 2015. The Relationship of the Affective Function of Family with the Emotional Intelligence of the Teenagers in SMP Negeri 1 Bulango Utara, District of Bonebolango. Skripsi. Department of Nursing, Faculty of Health Sciences and Sports. State University of Gorontalo. The principal supervisor was Hj. Dian Saraswati S.Pd., M.Kes, and Co-Supervisor was Ns. Rhein R. Djunaid, S.Kep, M.Kes.

The affective function of family is an internal function to fulfill the psychological needs, sharpening each other, gives love, and giving support. Emotional intelligence is an ability to recognize emotional, to recognize other's emotional, and to motivate our own selves. This research aimed at investigating the relation between family affective function and emotional intelligence of teenagers at SMP Negeri 1 Bulango Utara.

This research used Cross Sectional Method. The population and samples were 120 respondents. The samples were gained through Total Sampling. It used statistical analysis with chi-square test.

The research result showed that the respondents who had good family affective function were 78 respondents (65.0%), and those who had good emotional intelligence were 81 respondents (67.5%). The statistical test result using chi-square test gained $p = 0,000$ means that there is relation between family affective function and emotional intelligence at SMP Negeri 1 Bulango Utara.

It can be concluded that there is relation between family affective function and emotional intelligence at SMP Negeri 1 Bulango Utara. Therefore, it is suggested that parents should improve their support to their children in adolescent age to develop their emotional intelligence.
