

ABSTRAK

Sri Yulan Saleh. 2015. *Hubungan Tingkat Pendapatan Orang Tua dengan Status Gizi Balita di Desa Tabumela Kecamatan Tilango Kabupaten Gorontalo.* Skripsi. Jurusan Keperawatan. Fakultas Ilmu-Ilmu Kesehatan dan Keolaragaan. Universitas Negeri Gorontalo. Pembimbing I dr. Vivien Novarina A. Kasim, M.Kes dan Pembimbing II Wirda Y. Dulahu, S.Kep.,Ns.,M.Kep.

Status gizi memiliki pengaruh yang sangat besar dalam mewujudkan sumber daya manusia yang berkualitas. Salah satu yang mempengaruhi status gizi adalah status ekonomi dimana dipengaruhi oleh pendapatan. Tujuan penelitian ini adalah untuk mengetahui hubungan tingkat pendapatan orang tua dengan status gizi balita di Desa Tabumela Kecamatan Tilango Kabupaten Gorontalo. Penelitian ini menggunakan desain survey analitik dengan pendekatan *Cross Sectional*. Populasi dalam penelitian ini yaitu seluruh orang tua balita yang datang berkunjung ke Posyandu yang berada di Desa Tabumela. Tehnik pengambilan sampel *Accidental Sampling* dengan jumlah 35 orang. Tehnik analisa data adalah uji statistik *Kolmogorov Smirnov*.

Berdasarkan hasil penelitian didapatkan orang tua yang memiliki pendapatan tinggi dengan gizi balita baik sebanyak 40%, yang memiliki pendapatan rendah dengan balita gizi kurang sebanyak 28,6% dan balita berstatus gizi buruk sebanyak 14,3%. Kesimpulan penelitian ini didapatkan nilai $p=0,001$ ($p \leq 0,05$) yang berarti ada hubungan bermakna antara Tingkat Pendapatan Orang Tua dengan Status Gizi Balita di Desa Tabumela Kecamatan Tilango Kabupaten Gorontalo. Saran Diharapkan untuk orang tua yang mempunyai balita agar memberikan makanan yang bergizi karena nutrisi yang baik dapat mempengaruhi pertumbuhan dan perkembangan yang baik pada anak.

Kata Kunci : Tingkat Pendapatan, Status Gizi, Anak Balita

ABSTRACT

Sri Yulan Saleh. 2015. The Relation between Level of Parents' Income with Nutrient Status of Toddlers at Tabumela Village, Sub-District of Tilango, District of Gorontalo. Skripsi, Department of Nursing, Faculty of Health Sciences and Sports, State University of Gorontalo. The principal supervisor was dr. Vivien Novarina A. Kasim, M.Kes and the co-supervisor was Wirda Y. Dulahu, S.Kep., Ns., M.Kes.

Nutrient status has big influence in creating human resources. One of factors that influence nutrient status is economic status that in this case is income. This research aimed at investigating the relation between levels of parents' income with nutrient status of toddlers at Tabumela village, Sub-district of Tilango, District of Gorontalo. This research was an analytical survey research with cross sectional approach. The population of this research were all toddlers who visited the Posyandu in Tabumela village. The sampling technique was Accidental sampling which gained 35 people as samples of research. The technique of data analysis was Kolmogorov Smirnov test.

The research result showed that the percentage of parents who had high income with good nutrient toddler was 40%. However, the percentage of parents who had low income with lack nutrient toddlers was 28,6%, and percentage of parents who had low income with bad nutrient toddler was 14,3%. The analysis result gained $p = 0,001$ ($p \leq 0,05$), which meant there was significant relation between level of parents' income with nutrient status of toddlers at Tabumela village, Sub-district of Tilango, District of Gorontalo. It is suggested that parents who had toddler can give nutrition food, because good nutrition influences good growth and development for children.

Keywords: Level of Income, Nutrient Status, Toddlers
