

ABSTRACT

Nirmala Napu. 2015. Factors influencing the Selection of Home Care for Ulcus Diabetic Care in Gorontalo City. Skripsi, Study Program of Nursing, Faculty of Health Sciences and Sports, State University of Gorontalo. The principal supervisor was dr. Nanang Roswita Paramata M.Kes and Co-supervisor was Ns Abd Wahab Pakaya S.Kep. MM.

Home care is a long term care which can be given to either professional or non-professional officer who already get the training. The high number of ulcus diabetic caused the home care service should be increased. The selection of home care was affected by several factors. This research aimed at investigating factors influencing the selection of home care for ulcus diabetic care at Gorontalo City.

This research applied descriptive survey method with cross sectional approach. The population were 30 respondents. The samples were 30 children gained by total sampling. The technique of data analysis was to explain and describe the characteristic of observed variable.

The research result showed that budget factor influenced the selection of home care to ulcus diabetic at Gorontalo City; 73,3% respondents said that it was achievable, and 26,7% said that it was not achievable, and 90% said it was comfortable, and 10% said that it was not comfortable.

It can be concluded that factors influencing the selection of home care for ulcus diabetic care at Gorontalo City was budget and comfort factor. It is suggested that the home care service provider in Gorontalo City to promote more about home care service and maintain the current service of nursing care model.

Keywords: Home Care, Budget, Comfort
