

Chapter V

Conclusion and Suggestion

In this chapter, the writer takes some conclusion and suggestion based on result of the data analysis and description of the data in previous chapter.

Conclusion

From all discussion of this “skripsi”, the writer concludes that the implementation of the eight skill of teaching at SMK Paramita Sangkub in second grade of nursing and networking class were 77.5% it means that the teacher were applied the eight skill of teaching, the writer also found the skill which got the low score, this skill’ implementation is good, but this score was low if the writer combining with other skill, this is skill of reinforcement, this skill got 71.03 % with the criterion “good”, every single skill measured by using the calculation based on the questionnaire item, therefore, the writer could classify the each skill sort by low until high.

Suggestion

Based on the conclusion above, the writer found that most of the eight skill of teaching were applied at SMK Paramita especially in second grade.

The writer realized that based on the result, the skill of reinforcement got the low score, it indicated that to teacher have to more give more attention about this skill, which got the low score, the teacher have to improve this skill on learning activity with used verbal and nonverbal approach. It is aimed to the English learning process is going to successful. The writer also thought that this research is full of weakness

In addition, the writer suggests to the next researcher can did the same research but the content of questionnaire should more specifically in order to make the better research.
