

CHAPTER V

CONCLUSION AND SUGGESTION

Conclusion

In this chapter, I would like to state the conclusion of this research, the conclusion is based on the research finding have been stated in the previous chapter.

The illusionist is a film directed by Neil Berger presented a man who has illusion trick that fall in love to princess Sofia, but it is not like by the prince Leopold. This film contained some American Value. This film show that the main character Eisenheim is a hard work man, he never give up in a bad situation. Also, as an illusionist he has a privation, he never talk to others about the secret of his illusion. Eisenheim also always use his time to work because he realize that as a worker he have to use time as better as he can, he has a vision about the future of his life and he have do to prove it.

Another character such Sofia have idea that all the people born in equality, she think that everybody has equality in chance opportunity in their live, all the people is the same. Even though she is a princess he fall in love to Eisenheim an ordinary people because she think people are the same, has equality. Furthermore, other character such Leopold have big vision about the future, it is describe about American value about looking for the future and to change.

At least, from this research it can be taken moral value that the people have to try his/her best, trust to ourselves, try to believe something not only from what we see or the visual but try to analyze it.

Suggestion

Film is an interesting media to do a research, because it can show us not only about entertaining, but it is containing values and the others message. In this part, I would like to give suggestion to the next researcher to use film as the media of research in order to find out the other side of literary.
