

## Chapter V

### Conclusions and Suggestions

This chapter presented about some conclusions and suggestions of this research. It is concerning on the students' ability in component of speaking by using cooperative script.

#### Conclusions

Some conclusions are presented based on description of the analysis about the developing students' ability in speaking by using cooperative script, namely:

First, there are different results of students' ability in pre-test and post-test. It can be conclude that model of learning in teaching speaking, cooperative script can help students. The second, after doing treatment, the result of students was be improved. In the pre-test the total score is 233 and in the post-test total score is 442. The mean score of students' ability in speaking before treatment is 8.32 and the mean score of students' ability in speaking after treatment is 15.78. So the different mean score between pre test and post test is 7.46. Therefore it can be concluded that there is significance different between them.

#### Suggestions

Based on the conclusion an above, the researcher took some suggestions as follow: First, for the teachers, who are concerning this problem, they can choose model cooperative script in learning process because this method can improve the students' ability. Second, the researcher recommends for the next reseacher to continue this research in deeply about historical of cooperative script itself. Third, cooperative script can used in another skill like listening, reading and writing in English teaching.
