

CHAPTER V

CONCLUSION AND SUGGESTION

Conclusion

Based on the explanation on previous chapter, I take conclusion that the students' at class VIIIb SMP Negeri 2 satap Bonepantai have interest and motivation in reading English text. Based on the research findings, the result of students' interest is 73% and categorized into high category and students' motivation is 65 % and categorized into high category it means that the students' has high interest and motivation in reading English text.

In addition the students' interest and the students' motivation in learning has important rule because the students' who has interest in learning they can creates a feeling of love , interested, and enjoy in learning. And also the students' who have motivation in learning they will show the spirit in learning, direction, and persistence of behavior and this is make learning process will be run optimal.

Suggestion

After conducting the research and made some explanation about it, now it comes to the suggestions.

For the Students

1. To built the students' habitually in reading English text and grown their interest.

2. To enrich the students' interest and motivation in reading English text with some items appropriately.

For the Teacher

1. To create variation techniques not only for the material in teaching that related with English text , but also for the methods of teaching and learning process in the classroom.
2. To provide medium to built students' interest and motivation in reading English text.
