

## ABSTRACT

Rizki Rinaldi Humolungo, Student ID. 614409025. "Characteristics of Wet Field Rice Farmers in Limboto Sub-district, District of Gorontalo". Principal Supervisor is Supriyo Imran and Co-supervisor is Yuriko Boekoesoe.

This research aims to explore the age, tenure working as farmer, level of education, numbers of family members of the wet field rice farmers in Limboto Sub-district, district of Gorontalo. This research also aims to find out the extent of the rice farms and the number of rice yields by the wet field rice farmers in this particular sub-district.

This research uses survey method, and the data taken from the sample are primary data taken through interviewing to 60 farmers as respondents. These respondents came from two villages, Tenilo and Hunggaluwa with 30 farmers from each respected villages. The interview is conducted through census technique. The secondary data are obtained from the District office of Agriculture and from Statistical Bureau at the District of Gorontalo (BPS). The data were further analyzed using descriptive statistics.

The analysis reveals that in average, the largest proportion of the farmers (50 respondents or 90%) are old (more than 60 years old). Meanwhile, 42 respondents or 70% of them were only able to accomplished elementary school education. In addition to that, 33 respondents or 55% claimed that their family numbers ranged from 1 to 3 members. Further, 12 respondents or 60% claimed to have been farming for less than 10 years; and in average the size of their farming field are 0.25 to 2 Ha, and the wet rice farming land in Tenilo village is 32.60 Ha and the percentage of this farming area is 61.11% and the production percentage is 61.26%. The biggest rice production in Tenilo village is 13.125 kg and to land yields 402.61 Kg/Ha with the percentage of 50.16%.
