ABSTRACT

Zulkifli Yusuf, Alvian D. Bulango. Inventory System in Social Agency of Gorontalo Province. Final Paper for Study Program of Diploma 3 of Informatics Management, Department of Informatics, Faculty of Engineering, State University of Gorontalo 2015.

This research aims to study the inventory system of the Relief Goods in Social Agency of Gorontalo Province. We develop a development recommendation on computer-based management system of the goods inventory to solve the miss presentation and the delay of information presentation and the data search through MS-Excel that is still operated per sheet of data. This research collects the data, followed by the analysis, and further a system design is conducted. The data collection methods are observation, interview, and literature review. The system is design in form of an application using the Visual Studio 2010 as the programming language and the MySQL Database.
