

## Chapter V

### Conclusion and Suggestion

The goal in this chapter is to give the relevant conclusions about students' perspective on the use of self access center. Besides, the positive suggestions presented in this chapter.

#### Conclusion

Based on the description finding and discussion about the students' perspective on the use of self access center. It can be concluded into some points that related to research question.

The result of the research showed that there are many function of self access center. All the students or 100% students that became the participant agree that in self access center there are media such as computer, internet and also others media for supporting the teaching and learning process, such as Software, TV, LCD, DVD and Camera. All the facilities that provided in self access center has a function to make the students easy and also feel interested to follow the teaching and learning process. However some students did not feel comfortable in using the facilities, such as the lack of units of computers and also the connection of internet that was not enough good.

Self access center also provide some space for the students such as: reading and study corner that used as a place for the students in reading or doing the task, listening corner which is make the students easy in listening activity, multimedia

corner that has some units of computers that possible for each students to use the computers and also video corner that has a function as a media for the students to watch the video that related with the material. The result showed that some the space that exist in self access center space were rarely used by the students, such as the video corner or multimedia corner. Space that always used by the students is reading corner. And the activities so on self access center is effective.

There are many advantages of self access center for the students of English Department. The self access center is a place for the students and also the lecturer that provided as a supporting media to make the process of teaching and learning easier and also enjoyable. All of these facilities will motivate the students in their process of learning because they will feel comfortable when they are using the media as a fun learning activity.

However, sometimes when the students use the computer or internet, they access something that was not related with the lecture process. Something that also became the weakness of self access center the connection of internet. Sometimes, the connection make them feel bored inside the self access center because it was not like their expectation.

### **Suggestion**

Based on the result of research, the researcher suggested some points

below:

Self access center has provided some media that are very important for the students, so it is suggested for the students that they should use the facilities ' as well so it can make an improvement in the students' selves and also their ability.

The organizer of self access center should make rules about how to use self access center. So the students will obey the rules and they will not do something that has a negative impact in self access center.

The decision makers in this case are the head of English Educational Department and the head of laboratory, they should care for the facilities in the self access center because some students said that there are fewer computers and also the connection of internet was very low. Therefore, students improve their ability by using self access center and then students will have a good perspective about the use of self access center.

For further researchers who are interested to conduct a study on the same topic of the research, this research can be a reference for them. So the further researchers are expected to find more about the students' perspectives of self access center in other parts.
