

Chapter V

Conclusion and Suggestion

In this chapter, the researcher takes some conclusion based on the result of the data analysis and description of the data in chapter IV.

Conclusion

Based on the result of this research, it concludes that with this technique students can memorize several of vocabularies, thus, their vocabulary is added and improve. Before using this technique, where the students' have less vocabulary.

From the analysis of this research, there are different between the result before and after the application of the treatment by using San Francisco Game technique. The result is based on the analysis of testing hypothesis that is t -count = 9.20 and H_0 is received.

Improving students' ability to memorizing vocabulary by using san Francisco game technique improve students' vocabulary, it proves by the data of pre test and post-test, the data of pre-test is 14.35 and post-test is 16.5, besides, the mean score of students' vocabulary before the treatment is 3.39 and after the treatment is 13.4.

Furthermore, based on all results, the researcher conclude that improving students' ability to memorizing vocabulary by using san Francisco game technique can improve students' vocabulary, it shows that their vocabulary is better than before using this technique.

Suggestion

By the result of this research, the researcher hope the English teacher can use san Francisco game technique in class to improve students' vocabulary because this technique is one of simple and fun technique to improve students' vocabulary beside using dictionary

In addition for next researchers, they may apply this technique in a different topic or school in order to improve students' vocabulary.

For the teacher, the researcher hope uses this technique to teaching in English learning, especially vocabulary; they would not be stuck in some particular teaching strategies.
