

ABSTRACT

Suci P. Korompot. SIUP Data Record Information System of Gorontalo City. Final Task. Study Program of Informatics Management, Department of Informatics Engineering, Faculty of Engineering, State University of Gorontalo, 2015.

This research aimed at finding out and analyzing system and redesigning a computerized system to be used in SIUP data management system. The problem was that rerecording data using Microsoft Excel application needs a long time, data searching is expired, and data classification takes a long time because the data needed to be searched one by one.

This research was conducted started from data collection method, and then data analysis, to system designing. The techniques of data collection were observation, interview, and literature study. The system, then, was designed in form of application using 200 visual basic programming language and MySQL database.
