ABSTRACT

Maryam Mahmud. 821312035. Proposing Scientific Paper Entitled “Study of Prolanis Member of Diabetes Mellitus Type 2 Patients’ Obedience at Puskesmas Suwawa, Bone Bolango Sub-districts”. Principal supervisor is Dewi R. Moo. S.Farm., M.Sc., Apt and Co-supervisor is Madania S.Farm., M.Sc., Apt.

Diabetes mellitus patient’s obedience is patient behavior in taking an action or seeking the treatment regularly. This research aims at finding out the prolanis member of diabetes mellitus type 2 patients’ obedience at Puskesmas Suwawa, Bone Bolango sub-districts. This research is a descriptive quantitative with cross sectional approach using survey method. Research data are obtained from questionnaires which are distributed to 36 diabetes mellitus type 2 patients at Puskesmas Suwawa, Bone Bolango sub-districts. Research result shows that from 36 patients, there are 4 patients (11%) who have good category, 7 patients (19,4%) who have sufficient category and 25 patients (67,4%) who have less category.
