

## Chapter V

### Conclusion & Suggestion

This chapter discussed of the conclusion and suggestion of research based on the result of research about analysis students' creativity in learning English at SMAN 3 Gorontalo.

#### Conclusion

Based on the result of research, it can be concluded as follows:

1. Creativity is one of the important potential that should be develop in every students through learning activity in school.
2. The students in SMAN 3 Gorontalo class XI. MIA<sup>1</sup> always active in learning process such as giving questions, answered the questions, inquisitive about something which not clear in learning, developing ideas and so on.
3. The students' creativity in class XI. MIA<sup>1</sup> at SMAN 3 Gorontalo was included inquisitive, persistent, imaginative, collaborative and disciplined. However, not all indicator seen from the observation because there some indicators it hard to observe directly and should appropriate with the material, teacher's method and strategy in teaching and learning process.
4. Students' creativity in learning process help the students' to reach the good achievement in learning English.
5. Students should have motivation, intelligence, interest, attention and talent in increasing their achievement in learning because those influence their creativity in learning English.

**Suggestion**

1. Teacher should help the students to increase their creativity. This can be done by giving the students chances to ask questions, have discussions, express their ability in English, and try to help the students to investigate and solve their problem in learning English.
2. Teacher has to be able to choose the appropriate method and technique without abandoning the intended objective.
3. The students should develop their creativity especially in learning English to improve their achievement.
4. The students should increase their ability in English by trying to enrich their knowledge related to English, practice their English, and enlarge reading.
