

Chapter 5: Conclusion

This chapter presents the conclusion of the research based on the data findings. Also, this chapter offers some suggestions that related to the topic and for the better research conducted by the next researcher.

Conclusion

Based on the data findings, it can be concluded that the students still making errors in writing lexical collocation. Then errors were occurred in the two types of lexical collocation itself. The types are the word combination of *verb + noun* and *adjective + noun*. The number of errors found in students' writing as many as 14 errors which is decided as 6 errors in verb + noun word combination and 8 errors in adjective + noun combination. While others data found still presenting natural-sounding word combination, but these data are presenting their errors due to influenced by their native language, which is Indonesian language. Then, these types commonly occur in students writing. Otherwise, the occurrence of lexical collocation based on these two types are most errors and could not be accepted both by the hearers and the readers based on the meaning in order to create a complete meaning related to the context of the sentences written by students. Moreover, based on this study's scope and delimitation which is only focus on two types of lexical collocation, it does not mean that the others types are not exist in the students'

English writing. They existed even though as not many as the both types which is mentioned.

Then, based on the analysis results, the students still have lacking knowledge in combining words. They are still doing errors in using lexical collocation when they write. This errors are occurred as they combine words and they do the wrong way in combining words itself. The data findings showed the errors of *verb + noun*, and *adjective + noun* word combination. This study found 6 data findings of the type word combination of *verb + noun*, and found 8 data findings of the type *adjective + noun* word combination. Most of the students did errors in choosing words which the word acts as the *collocator* in order to combine the *base* word. They chose the wrong combiner word then it created a disorder meaning and unnatural-sounding. This error way in combining words is because they are influenced by their native language, which is Indonesian language. Otherwise, they are also not really mastered the using of collocation itself, particularly the use of lexical collocation. Furthermore, when they are asked by the researcher, some of them could not recognized about collocation itself. In fact, they had already been learning writing course, from writing I to writing IV courses. In order, we are English students, English learners, but we still miss some basics English proficiencies, including the proficiency of using English lexical collocation.

Suggestion

These are three suggestions for three different categories below. The suggestion is presented to give the advantages and for the better future in teaching and learning process itself, particularly in writing courses.

For English students

Those data found are just the sample things. Still there many others outside. As the students of English department, we need to have good skills in English. Not only in speaking, reading, and listening, but also in writing. Writing is one of the productive skills in English. By having good writing skill, we can be recognized as the English learners. Then, it is necessary. We could not ignore it. We have to pay more attention on this. Moreover, in the last semester, we have to conduct a scientific writing as we known as skripsi. We need have a good writing skill to conduct this paper. Many basics English proficiencies in writing. One important basic proficiency is the using of lexical collocation. This is a skill in combining words. Mastering many vocabulary is not enough to write well. We need skill in using lexical collocation to complete it. Then, learning this proficiency more depth is necessary. Furthermore, enriching your vocabulary is necessary in order to make you easily choose words to be combined. You can enrich your vocabulary by reading English writing. Beside you can enrich your vocabulary, you can learn also the English native's way in choosing and combining accurate words in order produce natural-sounding. Then, correct word

combinations are delivering strong meaning and natural-sounding based on the natives English commonly used in their speech and writing. As English users, we imitate the way they use English as their native language and for us as a foreign language.

For English lecturers

Teaching is an activity where we transfer knowledge to the students. By teaching well, the students can catch well the knowledge transferred too. Moreover, teaching in case for the productive skills course is not easy as thought. Then it is needed to try hard to do not miss anything and left any materials, or even the basic materials. The lecturers need to pay attention more to the material they teach, whatever the material, including study about collocation. It is one of the basic competency in writing in English, the lecturer need to give a deep understanding to the students for the better writing skill. It is because still many English students could not recognize what collocation is, and how to use it. Then, by teaching more deeply regarding to this sub lesson, hopefully the students can have proficiency in this skill and can write English in the good way due to creating natural-sounding as the English natives do it, and as the qualified English learners.

For the next researchers

This research only picks up two types of lexical collocation, where still there three others types left. This way is taken due to of the both types commonly occurred

in students' English writing, but it does not mean that the other types do not exist in students' writing. The students sometimes use that types, but they are only not really familiar with that. Then my suggestion is, for the next researcher who wants to conduct research, you can take the others type to be analyzed based on your passion.

Then, the researcher realizes that in this paper is still many worst things and still need improvement to be perfect. The researcher itself tried hard to conduct this research as well as the research can do. Otherwise, no one perfect and all things is needed to be developed. Then, still many the weaknesses exist in conducting this research. Then the suggestion for the future researchers, hope this research can be one of the reference and hopefully can help the other researchers in conducting the good research. The perfectness is created from the worst things in advanced.

HOW TO BECOME A GOOD ENGLISH TEACHER TO NON-NATIVE SPEAKER OF ENGLISH

We are as the educator, we will become a teacher later. Become a teacher is not easy. Even though there are some way that are providing when we teach English. However it doesn't easy to find the best way to teach. In reality, we are not the native speaker but it doesn't mean we could not teach English well, otherwise the native speaker also may not be able to teach English well, because it is about teaching ability. Sometimes, students will respect if they know you are good in teaching. To be a good teacher, first of all we have to educate ourselves, before educating others. The main thing is the desire, become a teacher we should have had the desire to become a teacher.

This article also was giving a brief story of Jing Jung as, his story as an English teacher. He shared his experience and method in term of teaching English as a second language. He said that to be a native speaker of English we have to do the same thing that they do also, they become a native speaker because they already learn English in long time ago. So, for mastering English we also learn English intensely.

Hello the readers of my blog.... meet with me again

For today I would like to tell you about Karawo. Karawo is the part of Gorontalo culture, the same as Batik, Karawo is a symbol the culture of Gorontalo. Karawo or embroidery is that only exists in Gorontalo. Sulam Karawo has existed since the 17th century, only some people did this activity made embroidery. But now this tradition continues till this day. Every year, Gorontalo usually celebrate this culture by making an event to support this art of Gorontalo. In this event, the designer will get a big job, because this event just celebrates once a year and all of people in Gorontalo are waiting for this event. There are too much

Technology And Educatio

insert technology ?
apply ~~using~~ technology.

The integration between technology and education is important thing to our learning process. in modern era technology is alike friends for human because, anywhere, anytime ,we always using technology and by technology we can know all information from around the world. however, The plan to insert technology in learning process is good step to create digital native that have different intelligence and characteristic with anothers to make a change and also to compete in technology domain with another country in the world. in addition, the role of technology in learning process is not only useful to students but also to teach the teacher how to using technology modern, because in some case most of teacher in indonesia ^{can} is not ^{can} using technology in their life. it is a problem that still faced in this country to create generation of digital native.

HIJAB

My opinion about beautiful women is not only from a face, body, or appearance but also how her characteristics and her religion, because not all beautiful women have good attitude and religion. Actually I really like women which wearing hijab and close all of her body that do not should showed to all people because I think they are is not only beauty from appearance but also from their heart.

In this era, many people try to make and developed style to wearing hijab, they are say this is a method to introduce hijab and Islam to around the world because still

much people have negative thinking about Muslim especially in Europe and USE. in the past of few weeks we surprised with information about jilboobs (the wrong hijab), jilboobs is women that use hijab but they are showing the mode of their body) it's really scratch to Islam because is not suitable with ideology of Muslim.

Body shape.

If you want make any style in your hijab is not a problem, but you should know about the rule because, The function of hijab is not only as a fashion to women but hijab is have important role to protect a women from any crime.

Second meeting

In second meeting of writing 4 we all in A class learning about paraphrase. mam karmila flatten about paraphrase and how to make a paraphrase in a paragraph and she also give tips for make paraphrase easy. Actually in my mind paraphrase is difficult subject, but when I more learn about that I think is not like I know because you should learn the tips to make it easy.

And after explain about the definition and example of paraphrase mam karmila give we all exercise to try our understanding about paraphrase. However, In afternoon I do not have much idea because I'm so sleepy and tired after my activity before but, I'm trying to make paraphrase.

In this meeting also mam Karmila give we all her first homework in writing 4 that is we should make a paraphrase in some paragraph and upload in siat, but before mam Karmila have divide us in group that contain two people to each support.

I think that is my experience in writing with mam karmila and if you have comment or suggestion please written.

Thank You For Read.....

Today I will tell you about the second meeting in writing IV subject. In that meeting ma'am Karmila said that he was very pleased and proud with the results of our posts in the blog. It is a passion for us to further improve our skills in writing. Topics to be discussed on that day that was paraphrase. Ma'am Karmila told us about the theory of paraphrase and the ways of doing paraphrase. After giving the materials, ma'am Karmila gave the opportunity for us to paraphrase a sentence and write it on the white board. After that, ma'am Karmila gave us homework and we do it with our partner

First of all I would like to say thank you for read my blog. Let me introduce my self, my name is Yuliana Maleo, but you can call me ayin. Now I am on fifth semester, I think that will be a first step to face a hard semester (sixth, seventh, and eighth semester) because we have to conduct a research. For the first time in this blog I would like to share about my first meeting in writing IV subject. Thursday 18th of September that was our first meeting in writing IV. Actually, that was our first time with ma'am karmila because she never teach us before. So, are really excited to learn the material. Ma'am karmila came to the class and after that she explained us about the course syllabus that should be past in this semester in writing IV subject.

After she explained all about the course outline, she also explained the rules of the class. For example, we should coming on time and do not miss the class more than 3 times because we will get error for our score. In writing IV subject we had several topics that should be discussed until the end of this semester. For example like paraphrasing and references and how to write with APA standard (academic writing).

The interesting one is when ma'am karmila asked us to create a blog and we have to write something there. Everyone must have one blog and ma'am karmila will check our writing in that blog and we have to check the other student's blog and also gave them comment or suggestion about their writing.

Guys.. can you guess my felt in the last semester especially in writing subject I felt little dissipated, about that guys cause i got score unexpected. But now I hope can get more and more and I can do better.. better.. and more be better.. in writing IV guys. In writing ya we have something interesting in this subject we have new lecture it doesn't mean she newer come in our University but it's the first time she teach us. How do you fell guys "so far so good" that is sentences she often said to us.. felling better she teach us she is funny and really clear when she explain our material although we will have so many assignment looking very busy in fift semester, it is the process guys for us to (grow up our ability) skill and etc. Hope you are enjoy the process guys. And I hope I can get best score and will try do best for all thing. I know it's still far from perfect, so I need your comment, and suggestion to make it perfect...D that all guys for now and we will meet again in the next time see you guys.. hope you didn't board when you are readed,...

grow up our ability ?

About what I learn in extensive reading class

In extensive reading class my group present about literary work. Al-quran is the most beautiful literary work in the world. And my group discussed about one of surah in alquran. The surah is al-hadid. But actually my group is can not present the meaning of the surah because our knowledge is deep and we afraid if we wrong to send the meaning. So, my group just talked and discussed about gin Qarin. Who is gin Qarin? Gin Qarin is gin that always in beside human. We can say gin Qarin is twins of human itself. After we discussed about gin Qarin, ma'am yunita come and we discussed about the meaning and teaching about al-hadid. Al-hadid is about sense of life. In this world every human is actor and actris where world is just a drama. In surah al hadid life is like leaf where rain and the growth which it brings forth, delight (the hearts of) the tillers; soon it withers; thou wilt see it grow yellow; then it becomes dry and crumbles away.

About research on language

As student semester fifth, we have project. The project is research on language. Before we made research, we got material how to make research. To make good and easy research. The steps to make good and easy research is first, write the what. the meaning is what topic you choose? Second is have to write the why. The meaning is reasons choose the topic? the reasons is have to scientific reason. after write what and why, the next step is write research design. the research design is like what method will use, technique of collecting data, and analysis data. The other important thing in research is the theory. what theory support we research. I hope this posting have benefit for you. THANK YOU.. :)

My story in gorontalo state university

Hello guys...my name is ahmad rifai and I will tell you about my story in gorontalo state university. I graduated from senior high school in 2012 and continue my study to gorontalo state university with major english education, I choose english education because I really like to know and study other country language beside my national language. although I really like english, but actually I don't know much about this subject because I never have course or experience about this before so, I begin my study with the basic of english education.

during I study in this university I'm not a protuding student in education but I ever have an achievement in my major that is I become the best speaker in students expo, I can't imagine why mam nony choose me as the best speaker but i'm really happy and so proud to my self and I promise I will always improve my speaking. Beside I have subject that I really like, i'm also have subject that I think is difficult like writting and grammar. When I study this subject i'm always have hindrance like confuse and don't understand about it, but I hope I can improve it in this semester.

That is my story in gorontalo state university, thank you very much for read especially to Mam, KARMILA MAHMUD....

mean. And the last one is Teaching English as a second language. What teachers' goal to teach English subject are to make their students have a good ability in speaking, listening, writing and reading aspects. The authors give a way to make students easy to understand what will the teacher say, for the example is become a model to the students when want to practicing something or say something, it can be really helpful for the students to learn their second language.

Rabu, 08 Oktober 2014

There is no writing class on last week because ma'am Karmila went abroad thus I have no idea what should I told on that meeting. But I want to share you guys about my activity on this day. Today is my last day to follow training from PMW (Program Mahasiswa Wirausaha) that's a one program of my university to support the young entrepreneur and I am one of them. My group and I was really excited when we know that we are one of the group that can passed the selection and we will get 20 million Rupiahs to fund-raising our new business thus we have to follow the training because the coaching gave us how to manage the money, how to manage time and know what my real characteristic. What I have to learnt today is business are not easy as I think before because there are have some step to reach the goal become a success woman in the future. The first step is starting; to control what we have to do first, the second step is profiting; I really love this step because we will know how much money that we get/ day or month. The third step is systemizing; the production's process, the fourth step is collaborating and then duplicate and the last one is the best step to be freedom; it means in positive freedom for the example we don't have to work all time because we already have some employee to change our position as a worker. In part of how to manage time, my coach gave us some tips to arrange our time more useful than before. The tips is we can made a default diary and we have to fill the schedule of my subject on university and how much time that I spend only to nothing to do and change the bad activity to Increase my knowledge like read a book or browsing in Internet about how to manage my business. And the best part of this training is when I did a test to know that my characteristic is, and I get Intim's characteristic means I am an interested people and I really excited because that's character is appropriate to be a leader, I mean to be a leader of my own self. I think that's all for today; tired day. C u next entry guys ☺👍

bad activity ?

The beauty of BUOL city...

Buol city is one of beautiful city in central Sulawesi. this city have location between two big city in Sulawesi that is Gorontalo in west and Palu in east. although pressed by two big city that famous in nusantara is can not abolish the beauty of Buol city itself, because this city have characteristic which make it different with another city in indonesia. Buol city also have many beautiful scenery because the environment it's still nature and good looking, such us busak island, tertaria, kumaligon waterfall, and still many more interesting place that we never see before in any part of the world.

The beauty of Buol city is not only in the land but also in the deep of the sea, many kind of coral and fish live in there from the unique until scarce animals also increase the riches of Buol sea and many people felt that. beside have much beauties natural, Buol city also popular with their hospitality because most people in Buol is Muslim about 95% from totally of resident. although most of them is Muslim, they living peaceful with another religion such us Christian, Buddha, konghucu, and hindu. people of buol city also living together with external culture like bugis (makassar), java, Bali, and Tionghoa.

That is the story of one the beautiful place in indonesia that you never know before...thank you for read and don't forget to give a comment...

Why people choose to spend a lot of their time in the office than gather with their family?

In modernization era, job is a important thing to some people, without a job you will have problems with your life. so, when someone get a job that they wish for, they are willing to spend out their time in the office than gather with their family. however, this is not all decision by the worker cause sometimes company also require to them doing overtime.

In the other case, luxurious life style is also become one of the reason why people choose to spend their time in the office than gather with their family. for some people in high class, have a luxury car, big house , good dress, and have much money, is a necessity that should be filled. And to support their life style, hard

to describe with our own words words alone. Sir. Zul in his seminar "anti plagiarism" stated that an easy way to make a lot of paraphrasing is to memorize the vocabulary then we can easily make paraphrasing.

Actually, this paraphrasing material I have learned from writing I, but until now in writing IV I still have difficulties to make a good paraphrasing. Alhamdulillah on writing IV I have a superb lecturer, she is beautiful, intelligent, and have a spirit. Guys you know who I meant, yaa... she is Mam Karmila Mahmud. I feel blessed in the semester Gets a chance at learning by Mam Karmila, because of semesters 1 to 4 I only teach one time by Mam in Intensive Course.

In my opinion, the way Mam Karmila teaching to us was very different from other Lectures. For example, last week she taught very well about paraphrasing. She first explained to us what it's paraphrasing? And then she saw a theory from an expert and our task is to make paraphrasing of the theory. Uniquely our task of it is we're only given a few minutes to read it and remember that theory and writings make paraphrasing. We find it very difficult, because this is the first time we made a paraphrasing in a very short time.

Alhamdulillah, finally we get to work on that task even though there are mistakes, because we are still in the learning process. After that Mam Karmila give different tasks again to us. The task is to explain about the contents of a paragraph to a friend, but we only have 3 minutes to read it then explains. Of course this is very interesting because we demanded to quickly understand and can explain it. In the end, all happy with the way Mam Karmila learning to us. I am very happy that day and also I am very motivated to get into more of the Mam Karmila in the future.

Wasslamualaikum wr. wb.

Assalamualaikum

Hello guys,, I am Yudi Hariansyah Djakaya and now I am fifth semester student of English Department, Gorontalo State University.

Actually, this is the my first post and I would like to tell you about my experience in students entrepreneur program. Hopefully you can get the new inspiration of it. Yesterday, I was join in students entrepreneur program at hall of MIPA. You know guys, the second rector assistant of Gorontalo State University said that "Menjadi seorang PNS belum tentu membuatmu menjadi kaya" it means that be a civil servant is not only the one way to be a rich man or woman, but you still have many ways to become a rich person. Guys, by being an entrepreneur you will be an independent person, hard worker, not easy to give up, and always have huge dreams. Guys, you can try from now because if you have graduated from this University you will get easy to find

[Intellectual Diary 2](#)

Nice to write again in this blog, and hopefully all of you who reads my blog is feeling great

It is the second of my intellectual diary, and in this time I am going to tell you about my lovely sister. I have one sister only and she is younger 3 years than me, but it does not mean I am more mature than her. When we fight, I am the one who will be cry, because I am easy to get tear, just see a person are crying I will shed tears even though I do not know the cause exactly. Having siblings like her is one of the happiness that Allah given for me, I really grateful of it. There are many things that I should take from her, She has a big care to anyone, or the way to be patient like her. She is the one who still make me strong in any problem that I faced. She hugs me, she heard what I am saying. Since I was 4th, I and my sister live in different place. I lived with my mother, while my sister lived with my grandmother. She just visited me in two weeks, sometimes I do not meet her in long time because my grandmother have her own business also. One word that I heard from his small lips and I could not forget "I will be back soon and we play together". So, that's why I love her so much because I already feel far from her before.

[Intellectual Diary 1](#)

Hello my beloved friends in class c and anyone else who reads my writing. I am sure you are really know who I am, nonetheless I am still introducing my name first. My name is Yuniar Duda, you can call me Niar. Everyone who saw my family name, they joked me Duda or widow, ohh no I am still single right now, Duda just my family name but it does not matter for me.

who are not native speakers of English can speak the language though not as good as the original speakers. And to be a good teacher must start from our desires, how much we desire to share knowledge with others, then we train ourselves as best as possible in the field and prepare everything that we needed later.

The things that need to be considered when we will teach English to non-native speakers of English. first we see the age of the students who will we teach., We have to adjust how we teach the children and adults. Secondly, we have to choose a way of teaching that is suitable for learners, because every student has a different learning style. Thirdly, we must be the facilitator for the students, before we teach we must already prepare and plan all we need in learning activities later on, so that the learning will go smoothly. Fourth we have to create a pleasant atmosphere so that learners we do not get bored with the material that we provide, .This can be started from the tone of voice when we teach. Body movement when we would explain something. this is very important in use when we teach English, so when they do not really understand what we are talking about,, then we will be helped by the movement of the body that will ultimately make them understand what we're talking about even if they do not know the meaning of a sentence of it. To make this lesson can work well not only with creating a classroom atmosphere that is very entertaining but also we need something that is interesting and stimulating them to be interested in learning English.

Nomad

Someone say that life is like a spinning wheel. Sometimes we are above and sometimes under. We live this life as nomads. Wheel of life as nomads feels slow spin; sometimes the pain is felt more than happy.

So sad when certain days where our time to gather with family, but we cannot do that. When friends make plans for vacations, we made plans to finish our job. No word of resting before they finish the job.

Almost every day life as nomads was faced with the problem of "you have to choose". Usually the choice of whether or not or want to run both but it is different where the

Fifth Meeting

For this posting, for the this time ma'am Karmila can not be present to teach us. because she had to go to vietnam for important matters. I used the free time to read the material that should be studied in this week and I also spent my time to do other tasks. Today I would like to tell you about my experience and friends when we were followed karawo festival a few days ago. I felt very happy and proud to be part of the spectacular events. The activity was participated by thousands of Gorontalo community . First of all I felt nervous when performed dance in front of the governor, the mayor and the people of Gorontalo. But behind all that I was happy. I invented this experience to be better than before.

Diposkan oleh [Yuliana Maleo](#) di [02.51](#)

Fourth Meeting

As you know in my blog from the first to the third meeting, I posted about our activities in the classroom learning process. So for my fourth posting, I would like to tell my activities during this week. This week I felt a fairly busy because after study in campus I have to carry out my obligation to work in one place. I have one activity that makes me and my friends busy was we were selected to participate in one of the wonderful activities that organized by the government in Gorontalo annually "Karawo Festival". I and my friends were selected to be a delegated from one of institution in gorontalo. I felt happy and proud to participate in that activity

Third Meeting

That was our third meeting in writing IV subject, and there was no class that day because maam Karmila unable to attend, he had to go abroad for her business. So we have to learn by ourself. I felt nervous when I have to learn and to understand the material without the guidance and direction by the lecture itself, and I hope he will be back as soon as possible :)
