Chapter V

Conclusion and Suggestion

Conclusion

Based on analysis in previous chapter, it is found that code mixing becomes the phenomenon in English Educational Study Program because some of the participants for this study use code mixing on presentation. Muysken (2000), provides three types of code mixing there are; insertion, alternation, congruent lexicalization. Based on the data finding, it is found that there are 17 corpuses that appropriate with insertion type, 2 corpuses appropriate with alternation type, and the last is congruent lexicalization type which is no data found because there is no data that can be classified as this type.

Moreover, there are seven reasons why people use code mixing given by Hoffman (1991), first talking about a particular topic, second quoting somebody else, third, being emphatic about something, fourth, Interjection (Inserting sentence fillers or sentence connectors), fifth, repetition used for clarification in this case the speaker want to make the speech sounds clear and make the listener understand. Sixth, intention for clarify the speech content of interlocutor. And the last reason of people mix the codes because of expressing group identity, in this case the way of communication of academic people in their disciplinary groupings are obviously different from other group. In addition, based on the data finding, this study finds 7 reasons why students use code mixing, there are clarifying something/ emphasize, lack of vocabulary, lack of practice, do not now the expression, habitual, occurs directly, and the last is nervous.

Suggestion

This study has some suggestions. First, the student in English Educational Study Program should be improved the knowledge about the distinguished of three type of code mixing there are Insertion, Alternation and Congruent Lexicalization. Second, for the reader it can give the information about the causes that make the students use code mixing in presentation in order to decrease the occurrences of code mixing in presentation. Third, the researcher hopes that this study can be a reference for those students of English Educational Study Program who want to conduct the similar research or topic about code mixing. Moreover, for those next researcher must be aware about the theory that they will use to identify code mixing in order to avoid miss understanding about the situation that happened in English Educational Study Program. Then, the researcher expects this research can give contribution to the linguistic fields particularly in sociolinguistic subject study in Universitas Negeri Gorontalo.

Appendix 1

Table 1

The Data Classification of Code mixing

No.	Code Mixing	Insertion	Alternation	Congruent Lexicalization
1.	*Kemudian* formulation the speaker must convert the message into the linguistic form	✓		
2.	*Kemudian* reading process	✓		
3.	Actually I don't know about the term or *istilahnya itu*	✓		
4.	And the last *adalah* syntactic nonsense	✓		
5.	The second is cognitive process of the brain used in reading are recognition prediction confirmation correction and termination recognition or imitation is the brain must recognize text or imitate reading *sedangkan* anticipate and prediction is order significance of input.	✓		
6.	*Dalam proses* instantiation there are two variables in general and specific	✓		

	schemata			
7.	The formula is first language strategies is plus poor second language *kompetensi* make poor second language in reading.	✓		
8.	Formal profession it's like *secara terbatas*	✓		
9.	Intrinsic if you are teaching in the school and you are legalized teacher you have a what is that *SK , SK* for teaching	✓		
10.	And the extrinsic unlegal school in what in *pedalaman* like in Papua isolated area.	✓		
11.	So this rule *berlaku selamanya*	✓		
12.	The first function of organization teaching profession is the unifier, unifier it means that *pemersatu*	✓		
13.	*Mislanya* if you used the reading method this like scamming scanning or extensivereading of course it still be used.	✓		
14.	If in written skill it concern about the grammar and it still be used in daily activity and its concern in listening and speaking skills, ok *ini* this is a written	✓		
15.	So listening and speaking skill are also			

	important in learning English. For the example they change the method into direct method and then reading method is the what is that *penyempurnaan* from this method.	✓		
16.	*ketiga yaitu* syntactic nonsense	✓		
17.	*yang terakhir yaitu* partial structure alternating period of productive reading creating partial understanding its from good man nineteen ninety four.	✓		
18.	General comprehension word for the example understanding a story as a role instead of certain sentence in emphasize the fun and enjoyment of reading in a second language *jadi saat kita membaca itu* when we reading something an article or a story we try to understand what is the text about.		✓	
19.	The message itself has been decided but it also know linguistic form we don't *maksudnya kita hanya membuatnya dalam* brain *kita* .		✓	

Appendix 2

Table 2

Percentage of Code Mixing Type Occurrences

No .	Types of code mixing	Frequency	Percentage (%)
1	Insertion	17	89.47%
2	Alternation	2	10.53%
3	Congruent Lexicalization	0	0%
	Total	19	100%

Transcription Data of Interview Section
Conducted on Students of English Education Study Program Class of 2013
Code Mixing on Students' Academic Presentation

Participant 1 AN
> **Researcher**
> ok the first question is there anything that make you cannot speak well? Can you explain briefly ?
> **Participant**
> I think it's about nervous more because of the teacher or the lecturer becuae the lecture ee you know ee the oral of the ecturer aa sometimes different lecture create different oral and nervous can create so much problem when you speak
> **Researcher**
> Eee What do you know about code mixing ?
> **Participant**
> Code mixing is when when you turn to your mother language ee as I assumed as I experience back in aa previews semester when especially it happened especially when you do public speaking for the example like that presentation
> **Researcher**
> And then do you realized that you are in code mixing situation when you are speak?
> **Participant**
> Very much no we just go ahead because eee when you think of something to much when you speak instead of what you should say next it could cost you should speak of and that would create more process. Ee code mixing is ok is a sign that you try to speak but when you do pauses instead of code mixing that will be more like hinder you
> **Researcher**
> And then how does the code mixing occur when you are speak if the code mixing occur
> **Participant**
> The code mixing occur when I feel that a certain word is unexplainable especially I face the situation that I've explain in the first question like the different lecturer with different oral you know nervous could create that some sour feeling you could get wrong and then you get wrong for real
> **Researcher**
> And then almost same question why does the code mixing occur when you do a presentation
> **Participant**
> Mostly because we did not prepare well our presentation some students are even deadliners you know and deadliner could also create code mixing because you don't prepare much you don't study much and when you have say something you don't know what to say because you don't do research about it yeaahh its happened to me a lot of times
> **Researcher**
> Ok how do you minimized the code mixing when you do a presentation
> **Participant**

Sorry ?

Researcher

How do you minimized ?

Participant

Oh minimized by ee maximizing vocabulary the used of that vocabulary the terminology to the vocab if if you cannot terminology of the word of the vocabulary you have at least understand like saying eee what should I say eee hangout you know if you cannot explain hangout then just say what what is hangout what happens with hangout that would you know see I don't know what I'd say anymore

Researcher

Ok and the last question what is your solution ? do you have any solution to minimized the code mix eee the using of code mixing itself

Participant

Eeeee of course is study but by study I do not mean boring study I mean fun study you study like style watching movies listening to music instead of reading books and dictionary that is like a college from 1989 lapan puluan wea are in millennium era and we need something that is digitalized

Researcher

Ok Arif thank you so much for your participation

Participant 2 DL

Researcher

Assalamu alikum warahmatullahi wabarakatuh so dila I'm here as the researcher and you will be my participant are you ready ?

Participant

Yes I'm ready

Researcher

So the first question is when you do a presentation is there anything that can make you cannot speak well ? can you explain briefly

Participant

Yes of course because actually I lag of vocabulary when I when I do presentation so ee what is sometimes I do code mixing in my presentation

Researcher

Ok and the second question is what do you know about code mixing

Participant

As I know code mixing is eee the combination of two language its can be between English and Indonesian language in our speech

Researcher

Okey and then the third question do you realized that you are code mixing situation when you are speak ?

Participant

Of course yes

Researcher

Ok and how does the code mixing occur when you speak? How does it can be happened

Participant

It can be happen when I stuck with my speech when I don't know what is expression what is the expression in English I mean this how can I mention the words in English so I did code mixing in I used Indonesia

Researcher
Why does the code mixing occurs when you do a presentation why ?

Participant
I think its because of lag of vocabulary

Researcher
Ok and then how do you minimized the code mixing when you do a presentation?

Participant
Maybe I will what is ehem I will replace the word with another expression

Researcher
And then do you have any solution to decrease the using of code mixing itself ?

Participant
Yes absolutely we have to improve our vocabulary

Researcher
Ok and the last question is do you think code mixing is good or bad ?

Participant
Actually its not always bad but to improve our speaking to improve our speaking is a students of English department we have to decrease the code mixing in our presentation

Participant 3 SI

Researcher
First question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly ?

Participant
yes there is

Researcher
What do you know about code mixing?

Participant
Eemm code mixing is mixing the language emmm there are two language that combined

Researcher
And then do you realized that you are in code mixing situation when you are speak?

Participant
Hmmm yes of course

Researcher
How does the code mixing occur when you are speak?

Participant
Eemm I think that eemm code mixing occurs suddenly

Researcher
Why does the code mixing occur when you do a presentation?

Participant
Eemm I think that because of lack of vocabulary or I don't know the what eee yaaa the vocabulary

Researcher
How does you minimized code mixing when you do a presentation ?

Participant
I think eee I should memorize the word
Researcher
And then the last question is , is there any solution to minimized or to decrease the using of code mixing when you do a presentation
Participant
Yah memorized that

Participant 4 YN

Researcher
The first question is when you do a presentation is there anything that make you cannot speak well? Can you explain briefly ?
Participant
Aa actually hen I do my presentation eemmm some I cannot speak because maybe eee that's because I don't prepare well or cannot aaaa cannot aaa understand the material as well and when I when I prepare it so I can speak really
Researcher
Ok the second question what do you know about code mixing ?
Participant
So code mixng is a some thatwe will code with Indonesian to English or English to Indonesian
Researcher
And then the third question do you realized that you are in code mixing situation when you are speak?
Participant
Of course because eeemm actually mmm as the as the English department aa emm I'm afraid that I'm afraid that I have aa ijust have ee little vocabs so it means I have to improve it so when I cannot speak well so I will use the code mixing itself when I do not know the vocabulary itself
Researcher
And then how does the code mixing occur when you speak ?
Participant
So when I realized that I cannot speak well so I will use the code mixing for the example eeemmm ok ladies and gentlemanso today I will bla bla bla bla so when I find the the vocab that maybe kebiasaan so I will so I will use the communicative language to to to to collect or to avoid that problem for the example custom or habitation and so on
Researcher
Why does the code mixing occur when you do a presentation why ?
Participant
So because it a really help me to its really help me to to speak because eeee as I as I say that before because eeee I do not the I do not know the the vocabulary itself so I use the code mixing
Researcher
And then how do you minimized the code mixing when you do a presentation?
Participant

So when I aware that code mixing that I use to many in my presentation so I will eeee I will mmmm use the communicative to avoid that problem

Researcher

And then what is your solution , what is your solution to to minimized the using of code mixing

Participant

So my solution is aaa back to the communicative language I mean when I do not know the the vocabulary itself I will I will find the vocabulary that that eemmm related to the to that wordi mean fo example the kebiasaan so I will use the custom or the lecturer will help me

Participant 5 WN

    Researcher

    Ok the first question is when you do a presentation is there anything that make you cannot speak well? Can you explain briefly ?

    Participant

    Eeee when I do my presentation the thing that makes me didn't didn't speak well because actually I'm nervous then eeee I forgot what word that have that I have to speak well then just it

    Researcher

    Eeeee what do you know about code mixing?

    Participant

    As I know that code mixing code mixng is eee when we are speak we mix the two language eee Into for example when we when we forget the word in English we convince the the listener what is it to we use bahasa for example.

    Researcher

    Do you realized that you are in code mixing situation when you sepak?

    Participant

    Yes I realized that I'm do ee I'm used code mixing when I'm eee do my presentation because if I forget the word or the sentence then I didn't I cannot what is that I cannot make them understand I will do I will changes my my language into bahasa

    Researcher

    How does the code mixing occur when you speak

    Participant

    How maksudnya ?

    Researcher

    Eee how does it occur eee bagaimana code mixing itu terjadi atau muncul

    Participant

    Eee because I don't know how to code mixing occur for me because I don't know what I do so just do code mixing hehhee

    Researcher

    And then why does the code mixing occur when you do a presentation why ?

    Participant

    Why code mixng occur I don't know actually because ee something just I don't what the meaning of why does ?

    Researcher

Eee kenapa bisa terjadi
Participant
Eeee kenapa bisa terjadi eeemm let me think why its just occur . just occur directly just occur directly then I just don't knw how to what is it how convince the so will just do my code mixing
Researcher
Ok how do you minimized the code mixng when you do the presentation
Participant
Ee actually I'll do minimized the code mixing mixing eee for example I will I stuck with the sentence or eeee talk then I will for the example I stuck with the word in my mind so will change to find another word that represent to what idea of my ee the meaning itself
Researcher
Ok and the last question ee is there any solution oo is there any solution to decrease or to minimized the using of code mixing itself
Participant
Eee for the minimized to increase to decrease my code mixing itself I think if you stuck with your idea or what you are talking about just just just find another word or another meaning that represent what you want to say.

Participant 6 IP
Researcher
First question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly ?
Participant
Yes
Researcher
What do you know about code mixing?
Participant
Eemm code mixing iss sometimes used bahasa sometimes use English language
Researcher
Do you realized that you are in code mixing situation when you are speak?
Participant
Yes I realized that
Researcher
How does the code mixing occur when you are speak?
Participant
Hemmmm I think because of lack of vocabulary
Researcher
Why does the code mixing occur when you do a presentation?
Participant
Yaa lack of vocabulary
Researcher
How does you minimized code mixing when you do a presentation ?
Participant
Read again annnnn practice
Researcher

Is there any solution to minimized or to decrease the using of code mixing when you do a presentation

Participant

Eemm Reading and eeee memorize every single word

Participant 7 VM

Researcher

Ok the forst question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly ?

Participant

Well actually there is something makes me eemmm feel unconfident or ee its like tip of the tongue because ee probably its lag of vocabulary because sometimes there's some expression that cannot couldn't be express in English so i find difficult to speak in presentation

Researcher

And then the second question is what do you know about code mixing?

Participant

Well eemmm as I know it is aaa occurred when you mix language for example is like when I use Indonesian and the I mix with English so its like code mixing I think

Researcher

And then the next question do you realized that you are in code mixing situation when you are speak ?

Participant

I don't I'm not sure sometimes I did it

Researcher

And then how does the code mixing occur when you speak?

Participant

Yes as my first answer when I don't find ee lexical choice in English so I will mix with Indonesian so ee is the way when its occured

Researcher

And the why does the code mixing occur when you do a presentation

Participant

Lag of vocabulary

Researcher

And then how do you minimized the code mixing whe you do a presentation ?

Participant

Aaaa I'm trying to find another words or its like whats called eeee similar meaning so I try to avoid the code mixing if I can find another word related to what I want to say

Researcher

And the last question is is there any solution to decrease the using of code mixing when you do a presentation?

Participant

So fisrt of all you have to you need to prepare before you come to presentation you need to increase your vocabulary and ya it's the point one because vocabulary limited vocabulary will lead us to code mixing itself I think

Participant 8 AW

 Researcher
 First question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly ?
 Participant
 Too many things that make me can't speak
 Researcher
 What do you know about code mixing?
 Participant
 Eee code mixing eeemm I think code mixing is you speak Indonesia and English language
 Researcher
 And then do you realized that you are in code mixing situation when you are speak?
 Participant
 Sometimes yes and sometimes no
 Researcher
 How does the code mixing occur when you are speak?
 Participant
 Eeeemmm I don't realize when it occur
 Researcher
 Why does the code mixing occur when you do a presentation?
 Participant
 I think eeemm I think because I lack of vocabulary when speaking
 Researcher
 How does you minimized code mixing when you do a presentation ?
 Participant
 Eemmm I will eemm I will learn also try to remember word by word in English
 Researcher
 Is there any solution to minimized or to decrease the using of code mixing when you do a presentation
 Participant
 Practice I think yah practice

Participant 9 RN

 Researcher
 The first question is when you a presentation is there anything that make you cannot speak well? Can you explain briefly?
 Participant
 Eee one thing that's make me cannot speak well is lag of vocabulary is the main main issue that can't speak well in the class
 Researcher
 Ok the second question is what do you know about code mixing
 Participant

Code mixing is ee mixing of language when I do a presentation when I mix aa English in bahasa Indonesia

Researcher

The third question do you realized that you are in code mixing situation when you speak

Participant

Yes I realized because sometimes I can eee I don't know how to say this in English so eee I say in bahasa Indonesia

Researcher

And then the for question is how does the code mixing occur when you speak?

Participant

Ooh because I don't know how to say the word in English so I use bahasa indoensia

Researcher

And why does the code mixing occur when you do a presentation why?

Participant

Because eee some students lag of vocabulary and they are some of them afraid to say they are afraid to make a mistake so they are using bahasa Indonesia

Researcher

Okey how does how do you minimized the code mixing when you do a presentation?

Participant

Eeee sometimes I when I don't know how to say the word I just stop I just stop and yes I just stop

Researcher

Ok and then eeee do you have any solution to decrease the using of ee code mixing itself

Participant

Eeeee to decrease the code mixing we should eee read more because when we read more we will add some vocabulary and we should eee speak English more often it will help

Researcher

Ok do you think code mixing is good or bad

Participant

Eee for English learner its very bad because when we mix the language we will ee hard to speak in front of people when we will find it hard to speak in front of people.

Participant 10 IK

Researcher

First question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly ?

Participant

Yes I always cant speak well

Researcher

What do you know about code mixing?

Participant

Code mixing ee code mixing menggunakan use indonesian language and English language

Researcher

And then do you realized that you are in code mixing situation when you are speak?

Participant

I realize but sometimes
Researcher
How does the code mixing occur when you are speak?
Participant
Eeeemmm maybe because I want to make clear what I said to make my friend understand what I mean
Researcher
Why does the code mixing occur when you do a presentation?
Participant
I think because of minim vocab that's all
Researcher
How does you minimized code mixing when you do a presentation ?
Participant
I should study and memorize the words
Researcher
Is there any solution to minimized or to decrease the using of code mixing when you do a presentation
Participant
Memorize the word and term annnnnnnn sentence

Participant 11 PM

Researcher
So the first question is when you do a presentation is there anything that make you cannot speak well? Can you explain briefly?
Participant
Yes eee when I do my presentation so eem sometimes I can't to ee represent ee what I'm going to talk so eee yeah actually I do it
Researcher
Ok and then the second question is what do you know about code mixing ?
Participant
Ee so code mixing is when eee someone talnk e someone mix ee two language when she or he speak
Researcher
And then the third question do you realized that you are in code mixing situation when you are speak?
Participant
Aaa yes so when I do code ee when I mix ee two language when I eee quite hard to find out the the correct word that can represent what I'm going to talk so I I realized when I when I mix two language itself
Researcher
So next question is ha how does the code mixing occur when you speak?
Participant
Soo eee for the example when I'm gonna talk ee so its quite hard to mengatakan like that so ee I realized when I do code mixing
Researcher
So why does the code mixing occur when you do a presentation?

Participant

I think eee because I'm nervous or ee also because I cant find the eee what is ee the word that can represent the eee the context that I want to tell

Researcher

And then how do you minimized the code mixing when you do the presentation

Participant

Actually I minimized it eee with what is preparation and also eemmm I try to remember ee the other word that can represent the word that I that I eeemmm gonna talk

Researcher

Ok and then is there any solution to decrease the using of code mixing

Participant

Aamm yes for the first is the students have to prepare well and also have to what is have to increase vocabulary in term to eee in term to in term the students can change or can find out the other word

Researcher

So the last question is do you think code mixing good or bad?

Participant

Eemm actually good for the students that ee mm that want to what is want to increase their vocabulary but for the English student that ee really that really what is for the English department students I think it's a bad because eee they have to they have to they have to speak English yes.

Participant 12 NN

Researcher

Ok the first question is when you do a presentation is there anything that make you cannot speak well? Can you explain briefly?

Participant

Aa the things that make me can't speak well actually ee so far eem oh ya so far if I can speak well is just because of the where I don't I mean don't ee menguasai ini apa ee rule I don't ee rule all the material or I mean I have no preparation but I think that's the only thing

Researcher

Ok the second question is what do you know about code mixing?

Participant

Code mixing ee I think code mixing is ee I mean the certain words that ee when ee I mean when there is aaa conver I mean conversation in the classroom so I mean the code mixing itself that the words that can make all the students aaa understand with that

Researcher

Ok and then do you realized you are in code mixing situation when you speak?

Participant

Code mixing ?

Researcher

Do you realized? Just like combine two words with another language

Participant

Ooo yes sometimes realized ye aa I just code mixing if I remember I think I realized I think I do the code mixing itself I mean in order to make the audience understand that what I'm going to talk to tell

Researcher

Ok and then how does the code mixing occur when you speak

Participant

The code mixing?

Researcher

Bagimana bisa terjadi

Participant

Eeeeee its happened when I'm I mean what I emphasized them that the those words so so I think that te way they understand I mean I do the code mixing itself

Researcher

Why does the code mixing occur?

Participant

Its happen because there is something that a makes them still confused I do the code mixing itself so that's why

Researcher

And then next question how do you minimized the code mixing when you do a presentation?

Participant

Minimized mengurangi bagitu? Eemmmm I mean try another word that make me eee apa ee to do the code mixing itself and yeah just eeee think the proper word that I mean that I need when they don't understand I mean eee because I know not all the presentation they don't understand and that's all I think

Researcher

And the last question is there any solution to decrease the using of code mixing when you do a presentation

Participant

Eemm fisrt is I think try to avoid the what the eee explanation or the material that makes them ee still aa don't understand about it I mean try to what makes them understand with your own words I mean the just combine eee for the example if you give an example just try to make example around the example like that.

Participant 13 AM

Researcher

ok the first question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly?

Participant

Ok the things that make me cannot speak well is first is nervous of course and less of vocabulary and eee because I'm not prepare well from my dorm or before presentation

Researcher

Eee what do you know about code mixing ?

Participant

Code mixing code mixing ok ee code mixing is ee put ee another language into another language e e another words from another language for another language I mean in a

sentence there are two language e e the example for example is eemm e e e ayu kau ini sering chattingan yes there is a chatting in that sentence it indonesian and mixing with English

Researcher

Do you realized that you are in code mixing situation when you are speak?

Participant

Yes of course ee many times I do code mixing actually

Researcher

How does the code mixing occur when you speak?

Participant

Ee I don't know ee when probably its our era so because our English department so that's automatically speak code mixing

Researcher

Why does the code mixing occur when you do a prtesentation?

Participant

Oo because ee I'm feel nervous so use Indonesian words for the example ee kelurga berencana or something like the words that I can't remember the English

Researcher

How do you minimized the code mixing when you do a presentation?

Participant

Em so there is academic word from English that I don't know so I minimized the code mixing in that situation so I think

Researcher

Oke the last question is there any solution to decrease or to minimized the using of code mixing when you do a presentation

Participant

Aa I think the best ee solution is prepare well before presentation so learn more eee do the best

Participant 14 MD

Researcher

The first question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly ?

Participant

Yes

Researcher

What do you know about code mixing?

Participant

Code mixing maybe use two languages

Researcher

And then do you realized that you are in code mixing situation when you are speak?

Participant

Sometimes

Researcher

How does the code mixing occur when you are speak?

Participant

Eeeemmm I don't know
Researcher
Why does the code mixing occur when you do a presentation?
Participant
eeemm its because of lack of vocab and the don't know the meaning and so on
Researcher
How does you minimized code mixing when you do a presentation ?
Participant
Eee make a preparation
Researcher
Is there any solution to minimized or to decrease the using of code mixing when you do a presentation
Participant
I think before I speak I should prepare

Participant 15 MW
Researcher
Ok the first question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly ?
Participant
Ee actually this the problem of vocabulary if I have something to say and I don't know how to speak it in English than I will face the obstacle
Researcher
What do you know about code mixing?
Participant
Code mixing ee actually I little forget about this but aa hopefully I'm right so code mixing is a mixing just like ee two different language into one sentence and you you speak it is emm for the example ee saya akan menggunakan toilte seperti itu
Researcher
And then do you realized that you are in code mixing situation when you are speak?
Participant
Yeah I do realized it
Researcher
How does the code mixing occur when you are speak?
Participant
Pardon me
Researcher
How does the code mixing occur when you speak ?
Participant
How ok aa this is a the situation happened when I speak in bahasa then I try to make it more a classy then I mix the ee those two languages
Researcher
Why does the code mixing occur when you do a presentation?
Participant

When I have just like the first my first argument that I could not find any vocabulary about that then I mix it

Researcher

How does you minimized code mixing when you do a presentation ?

Participant

Eemm just speak what I know

Researcher

And then the last question is , is there any solution to minimized or to decrease the using of code mixing when you do a presentation

Participant

I usually used the simple language so I didn't aaa I don't find any difficulties

Participant 16 FS

Researcher

So the first question is when you do a presentation is there anything that make you cannot speak well? Can you explain briefly ?

Participant

Ya em ekhm actually honestly I have been doing apa the participation in code mixing way eeh when I feel I didn't know how to em apa ee ah express the idea in English

Researcher

Ee what do you know about code mixing?

Participant

Ee I think that it is a code mixing is eeone way that's some told in apa in two bahasa and yeah that's all

Researcher

Do you realize that you are in code mixing situation when you do a presentation?

Participant

Ya of course because w w when you present something and you miss the vocabulary I mean that lag of vocabulary in English of course you will use the bahasa one

Researcher

And then how does the code mixing occur when you speak?

Participant

Em ya as I said that aa I used the code mixing when I didn't know the English when I talk when I'm in my presentation

Researcher

And then why does it occur

Participant

I don't know

Researcher

How you minimized the code mixing when you do a presentation?

Participant

Ee ekhm sometimes I just ee pass my the apa the information in my presentation and then I continue with another that I can speak in English

Researcher

And the next question is is there any solution to decrease the using of code mixing in presentation?

Participant
Ya of course read a lot and before you present presenting something so you must keep practice before you present your presentation

Researcher
The last question is do you think code mixing is a problem or not

Participant
Ya it is a problem particularly for students in English department because its our demands to to speak English all of the our the apa bahasa we must to to avoid with using bahasa when we present aa aour material because we are in English department our lecturer said that you have to use English and you know what I'm in fifth semester I'm as a fifth semester students of English department so it can be a it will be must for me.

Participant 17 AA

Researcher
First question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly ?

Participant
Hemm I think yah there is

Researcher
What do you know about code mixing?

Participant
code mixing isssss when you speak you used two languages

Researcher
And then do you realized that you are in code mixing situation when you are speak?

Participant
Hmmm sometimes kak

Researcher
How does the code mixing occur when you are speak?

Participant
Eee I don't know is just happened

Researcher
Why does the code mixing occur when you do a presentation?

Participant
Biasanya lack of vocabulary

Researcher
How does you minimized code mixing when you do a presentation ?

Participant
Learn and then try to remember the word in English

Researcher
The last question is , is there any solution to minimized or to decrease the using of code mixing when you do a presentation

Participant
I think eee I think we should study that's all

Participant 18 KT

Researcher

So the first question is when you do a presentation is there anything that make you cannot speak well? Can you explain briefly?

Participant

Ye in a presentation a person cannot really what speak fluently of particularly speak English because we are learning about the language so when I present the material in front of my friend I ee before I present my material I do ido practice so I can present my material without any without any problems but sometimes I cant say it clearly because because ee sometimes I cant I can't found the vocabulary you know I you know because I'm learning now and its too much that I can sometime I can found I can recall vocabulary that I want to use for

Researcher

The next question in do you know what is code mixing?

Participant

What I know about code mixing Is when some people when a person talk using English then he mix his language with the other language for the example with Indonesian ok

Researcher

Do you realized that you are in code mixing situation when you are speak?

Participant

Yeah I realized that

Researcher

How does the code mixing occur when you speak?

Participant

How does?

Researcher

How does it occurs

Participant

How does it occurs when I'm speaking when I'm speak in front of my friend or in public ee it happened ee just like ee yeah suddenly because sometime I cant produce English sentence I because I told that I still lag of vocabulary in English

Researcher

And then eemm why does the code mixing occur when you do a presentation ? why ?

Participant

Why because maybe lag of practice lag of practice I'm not too practice and vocabulary also nervous maybe also facts the code mixing

Researcher

So how do you minimied the code mixing when you are doing a presentation?

Participant

Do minimized of course before we present our material we have to do practice and read more to increase our vocabulary so when we are presenting material in front of the people using English particular in particular so we can speak fluently without any code mixing because ee I've told that is not really good when we speak in front of the people then we use code mixing

Researcher

Ok and do you have any solution ee to decrease the using of code mixing?

Participant

Any solution any solution emmm maybe the problem is we are not really learn we are not do practice so the solution is practice practice practice increase your vocabulary ee do practice and listening speaking because all of the skill is related than when you want to speak it s related to your listening ability also

Researcher

So do you think code mixing is good or bad?

Participant

Ee maybe for some reason is good but when you are ask in front of the people then you have to speak in English of course bad.

Participant 19 IMS

Researcher

First question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly ?

Participant

Yes there is something that make me cannot speak well for the example I lose my what eeee my vocab

Researcher

What do you know about code mixing?

Participant

Code mixing I think eeee when I speak English I use bahasa to

Researcher

And then do you realized that you are in code mixing situation when you are speak?

Participant

I always realize and I know I use code switch eh mixing

Researcher

How does the code mixing occur when you are speak?

Participant

Emmm I don't know

Researcher

Why does the code mixing occur when you do a presentation?

Participant

I think because I don't know the term also lack of vocabulary

Researcher

How does you minimized code mixing when you do a presentation ?

Participant

I will memorize all the words because I think that is really help me

Researcher

Is there any solution to minimized or to decrease the using of code mixing when you do a presentation

Participant

Hmmm to decrease I think I should learn more before I speak that's all

Participant 20 IN

Researcher

The first question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly ?

Participant

Yes of course its something happen in my presentation when I don't understand how to say word that's the time that I used code mixing code mixing

Researcher

And then what do you know about code mixing

Participant

Eemm code mixing is when we do not know ee word how to spell how to say ee some word or a term and we can use any language any another language to sometimes I used aa bahasa to use code mixing to make my listener understand what I'm talking about

Researcher

And then do you realized that you are in code mixing situation when you speak?

Participant

Eemm it absolutely because I know that ee I do not know how to say that word or the term

Researcher

And then how does the code mixing occur when you speak?

Participant

Ee I do not really know why it happen but eem I think its natural one because I didn't how I didn't know how to ee how to say the words or the term so I don't have any comment or any opinion why its occur when in presentation

Researcher

And the why does it occurs why does ?

Participant

Because eemm as to the best of my knowledge it occurs to make is an effort from the speaker to make the listener understand what does we mean what does we are talking about bu using another language

Researcher

And then how do you minimized the using of code mixing when you do a presentation?

Participant

Emm I'm not sure how to minimized eemm I just used a little a little beat word of another language ee to express what I mean and if I do not know ee so much word that I can express to the listener so I will use aa another language so I don't really understand how to minimized but I just use a little beat sometimes

Researcher

And then do you have any solution to decrease the using of code mixing ?

Participant

Eem in my opinion how to decrease code mixing is of course we have to increase our ee vocabulary and then ee actually grammar is absolutely because sometimes even tough we can speak well the structure of our sentence is not meaning is so no sense and for the fundamental reason just vocabulary

Researcher

Hmm oke do you think code mixing code mixing good or bad?

Participant

Hmm code mixing is good because we can use because we can use another language to express what we are talking about so sometimes when we got confused to to say the term is a kind of something that help us something that help us to explain it.

Participant 21 IU

Researcher

The first question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly?

Participant

Yeah ee actually actually ee when I face a presentation and then I don't know the words I don't know how to say the words and English I do code mixing as you told

Researcher

What do you know about code mixing?

Participant

Ee as I heard and as I learn that code mixing is when you when I when people speak in first language in one language and mix with that the other language

Researcher

And then do you realized that you are in code mixing situation when you are speak?

Participant

Yeah sometimes I realized but mostly I didn't realized it

Researcher

Ok how does the code mixing occur when you speak?

Participant

Ee when I stuck because I'm nervous in the presentation so aa sometimes the words that I want to say aa ee the ilang ini apa? Dulu aa lose and so that have to I should say in the bahasa

Researcher

Ok why does the code mixing occur when you do a presentation

Participant

Ee the first reason is aa I don't know the words because I lag on vocabularies I don't know the form maybe I don't know the formal language for that word and also I face blank at the time

Researcher

And how do you minimized the using of code mixing when you do the presentation ?

Participant

Ee for me I have to be prepared when I present something in front of people and also I should I think I should read well so that I know the words

Researcher

And then the last question is , is there any solution to decrease the using of code mixing?

Participant

Ee solution is aa read so many ee as many as possible in every time and then ee practice the vo the aa difficult vocabulary and then practice and the practice I think

Researcher

It is the very very last question ee do you think code mixing is ee problem or not?

Participant

Ee as the English department student it's a problem because we should we have to and we must say in English so that for us as the English department student we must say English everyday ee in our activity so for for the aa the other department its not a problem maybe.

Participant 22 ID

Researcher
The first question when you do a presentation is there anything that make you cannot speak well? Can you explain briefly?

Participant
While presentation so ok the main point of why I can't speak well the first is nervous of course I'm I'm nervous to speak in public so yeah I maybe aa so much eeh e I mean so much pausing and shaking

Researcher
What do you know about code mixing?

Participant
Code mixing is the collaboration between two language in a same time ee I mean when we speak when we speak so we collaborate one language which in another language

Researcher
Oke the next question do you realized that you are in code mixing situation when you are speak?

Participant
Yes ee same with the first question in presentation

Researcher
How does the code mixing occur when you are speak?

Participant
Because yeah emm some reason kak nervous so I forgot the the lang the English of the word so I used Indonesia

Researcher
Why does the code mixing occur when you do a presentation ? why?

Participant
Oh yeah ya because ee maybe I'm not prepare well about my presentation so I yeah I I I do code mixing

Researcher
And then how do you minimize the code mixing when you do a presentation?

Participant
Okey aa so before the presentation we have to practice more and prepare well about or presentation

Researcher
And the last question is , is there any solution to decrease or to minimized the code mixing when you do a presentation ?

Participant
So yeah so the first thing we have to do is prepare well and the second is read a lot so and raed a lot we have no limitation in vocabulary so that we can minimize we can ee we can minimized the code mixing itself.

Participant 23 HP

> **Researcher**
> The first question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly?
> **Participant**
> Ee ya ee there is something ee that word I know that word in English but I cannot I do not know the word in Indonesian so that's why I used code mixing when I present when I do presentation
> **Researcher**
> Ok the next question is what do you know about code mixing?
> **Participant**
> Code mixing is when someone changes her language ee from the A language to the B language
> **Researcher**
> And then next question is do you realized that you are in code mixing situation when you are speak?
> **Participant**
> Yes every time I realized it
> **Researcher**
> Ok then the next question how does the code mixing occur when you speak?
> **Participant**
> Ee it is when I forgot the idea I knew that word in a language but when I interpret the word into the language that I used i cannot find the word
> **Researcher**
> And then why does the code mixing occur when you do a presentation?
> **Participant**
> Ee maybe lag of vocabulary
> **Researcher**
> And then how do you minimized the code mixing when you do a presentation?
> **Participant**
> Ee change the word to the other phrase or anything by body language
> **Researcher**
> Ok eemm do you have any solution to decrease the using of code mixing?
> **Participant**
> Ee solution well I think we should ee read a lot to increase our vocabulary because ee mostly the code mixing occur to us cause we are lag of vocabulary
> **Researcher**
> And the last question do you think code mixing is good or bad?
> **Participant**
> It is ee not really bad because several words are hard to the other people

Participant 24 AI

> **Researcher**
> So the first question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly?
> **Participant**

Eem actually sometimes I cannot ee find the the correct vocabulary to say what I'm going to say so its quite hard to explain it in English since I cannot find the correct vocabulary so that's why aa so that's why I sometimes ee do I sometimes change eem ee mix my mix my ee speech with Indonesian since I I cannot ee find out the correct vocabulary oo the correct vocabulary

Researcher

End then next question is what do you know about code mixing?

Participant

Eem as I have learn in sociolinguistic class that code code mixing is when ee some one speak in a language and they che they mix with the other languages

Researcher

And then do you realized that you are in code mixing situation when you are speak?

Participant

Yes of course I realized it since ee its quite hard to think the ee in English so I I need code mixing to interpret to interpret to find out the the word so I change the exacty word so that why used Indonesian and I do the code mixing itself and I realized it

Researcher

Ok and how does the code mixing occur when you speak?

Participant

Eemm how ok first of all for example of course I speak in English first and after that when I cannot ee find the correct vocabulary to say that I'm going to say so use the recall from my brain the the Indonesian version that I'm going to say itself

Researcher

Ok and then what does why does the ode mixing occur when do the presentation?

Participant

Ee first probably I don't know the exact the correct vocabulary and then the second reason probably I I'm too nervous sometimes sometimes I know the English but if I'm in nervous situation I cannot find English the English version so I forget the English and then change it with Indonesian

Researcher

Ok and then how do you minimized the code mixing when you do a presentation?

Participant

ee for example e e I explain it if I cannot find the English version of only one word and then I will explain the one word itself in the other word I mean I explain the word itself that I cannot find the English and I will whats that ee explain it in in more in ee in sentence probably I cannot ok something like that

Researcher

Ee next question is do you have any eemm what any solution to decrease rhe using of code mixing when you do a presentation

Participant

Eemm of course improve the vocabulary itself

Researcher

The last question is do you think code mixing is good or bad?

Participant

Ee for me as a English department student when I speak English its bad because I need to I need to speak English well not to use Indonesian anymore in presentation especially in formal or class presentation of English itself

Participant 25 DM

Researcher

The first question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly ?

Participant

Eemm sorry can you repeat that question again

Researcher

when you do a presentation is there anything that make you cannot speak well ? can you explain briefly ?

Participant

Ow the reason the main reason why I cant speak well probably because eem aa because of the eemm the because the I think its because the lag of the order of the sentences or maybe because the yeah that's it the order of the sentence

Researcher

Ok next question what do you know about code mixing?

Participant

Ee code mixing is about when more than one language mix in a sentence or in a speech out together

Researcher

Okey the next question do you realized that you are in code mixing situation when you are speak?

Participant

No

Researcher

Ok how does the code mixing occur when you speak if there is a code mixing

Participant

Sorry what ?

Researcher

how does the code mixing occur when you speak if there is a code mixing occur/ you get it ?

Participant

No

Researcher

how does the code mixing occur how does it can be happen?

Participant

O maybe when you lag maybe when you running out of vocabulary maybe

Researcher

And the why does the code mixing occur when you do a presentation?

Participant

Same with the previous answer

Researcher

Ok the next question how do you minimized the code mixing on your presentation?

Participant
Well I think probably by making a more preparation and well plan a structure of speeches sentences
Researcher
Ok is there any solution about that one if there is aa suddenly occurs?
Participant
I think ee the only way is to read more and to study to get vocabulary I think it's the only way
Researcher
And the last question is do you think code mixing is a problem or not?
Participant
I'm not really sure of the concept of the code mixing actually.

Participant 26 AN
    Researcher
    The first question is when you do a presentation is there anything that make you cannot speak well? Can you explain briefly?
    Participant
    Yeah sometimes sometimes I want to express ee the words but et the time I lose my ee I lose my vocabulary
    Researcher
    And then the second question is what do you know about the code mixing
    Participant
    So the code mixing is the is the combination between the aa the target language itself ee actually the English and combine with the ee in ee Indonesia
    Researcher
    And then do you realize that you are in code mixing situation when you are speak?
    Participant
    Ee sometimes I realized ee sometimes I don't
    Researcher
    How does the code mixing occur when you speak? How can be happen?
    Participant
    How can be happen ee when I when I ee what is it ee when I lag of my idea and I don't I I e I don't know what to say
    Researcher
    Ok why why does the code mixing occur she you do a presentation? Why?
    Participant
    Because eee because of ee my I I because I I don't confident with my presentation
    Researcher
    And how do you minimize the code mixing when you do a presentation?
    Participant
    Minimized I just ignore that then I'm and I don't think that its its I I don t don't and I don't hink I worry about that
    Researcher
    So do you have any solution to decrease to using of code mixing?
    Participant

Ee probably we can ee decrease the et by ee what is it by ee what is it ee listening what ever English in may in e e I mean miscellanies idea such as a movie music or many more
Researcher
And the last question is do you think code mixing is good or bad?
Participant
I think code mixing its aa its fine if we aa if if we a use the code mixing because we as foreign students it it its prosecuted for us to be aa to use English for for language

Participant 27 NI
    Researcher
    First question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly ?
    Participant
    Yes of course
    Researcher
    What do you know about code mixing?
    Participant
    Code mixing is mixing two language when I'm speaking hmmm yah
    Researcher
    Do you realized that you are in code mixing situation when you are speak?
    Participant
    Yes of course I realize
    Researcher
    How does the code mixing occur when you are speak?
    Participant
    Heemm I think code mixing occurs if I cant speak English and I use indonesian language
    Researcher
    Why does the code mixing occur when you do a presentation?
    Participant
    I think because I don't know the term and I think eeemm because hmmmm lack of vocabulary
    Researcher
    How does you minimized code mixing when you do a presentation ?
    Participant
    Practice and then eeeee and then remember the words
    Researcher
    Is there any solution to minimized or to decrease the using of code mixing when you do a presentation ?
    Participant
    The solution issssss eeemmmm memorize what I want to say

Participant 28 FI
    Researcher
    The first question is when you do a presentation I there anything that make you cannot speak well?

Participant
Yes
Researcher
What is that?
Participant
Ee just like my students ee my friends condition at the time and also lag of vocabulary sometimes and ee yeah maybe the material that I actually I didn't understand very well amd the lecturer dosent want to help me
Researcher
Then what do you know about code mixing?
Participant
What is that
Researcher
Code mixing
Participant
Ee I don't really get it eee I don't do that in my presentation because I my self will confused with that one

Researcher
So if you do some code mixing or you mix some word samoe mixing word in presentation do you realized that you are in code mixing?
Participant
Yeah I realized that so I don't want to do that actually
Researcher
How does the code mixing occur?
Participant
In my presentation oh yeah when the other student ee or my friends doesn't really get my point so I will use Indonesian in this case to make them get understand
Researcher
And why it occur ?
Participant
Because they don't understand it in English so I will tell them in Indonesian
Researcher
How do you minimized the code mixing when you do the presentation ?
Participant
I try to use the easy words or the communicative language so just that
Researcher
So the last question is is there aaa by solution to decrease the using of code mixing itself when you do a presentation?
Participant
Ee for my self is a suggestion ee maybe try to use the communicative language and use the easier one so friends or the audience will get understand what do you say in English maybe

Participant 29 NT
    Researcher

First question is when you do a presentation is there anything that make you cannot speak well ? can you explain briefly ?

Participant
I think yes

Researcher
What do you know about code mixing?

Participant
Code mixing eeee code eh sorry code mixing is when someone use two language

Researcher
And then do you realized that you are in code mixing situation when you are speak?

Participant
Yes I always realize

Researcher
How does the code mixing occur when you are speak?

Participant
Occurs directly

Researcher
Why does the code mixing occur when you do a presentation?

Participant
eeemm I think because I lack of vocabulary and don't know eee don't know the term

Researcher
How does you minimized code mixing when you do a presentation ?

Participant
Study and then what is that eeee make some notes

Researcher
Is there any solution to minimized or to decrease the using of code mixing when you do a presentation

Participant
Hemmmm I think practice is the best way

Participant 30 ZL

Researcher
The first question is when you do a presentation is there anything that make you cannot speak well can you explain briefly?

Participant
Oh yes when I'm blank presentation right actually what makes me ee do not be well in speaking because you know sometimes I forget what I want to tell and then another things that aa I've aa I'm confused how to chose the good words ee o use it in my speaking and as well as I don't master at all my topic about

Researcher
Ok and then the second question is what do you know about code mixing?

Participant
Code mixing is ee consist of two languages that when someone speaks they will when they are speaking English then suddenly will use speak bahasa because they don't know the words in English to translate in English

Researcher

Do you realized that you are in code mixing situation? Do you realize?

Participant

Ee according to me I realized that I used the code mixing

Researcher

And how does the code mixing occur?

Participant

The code mixing occur when we speak to first to faster and then we don't know w when we don't know how to speak it in English

Researcher

Amd why does it occurs ?

Participant

Yes that is occurs because we don't have any choice

Researcher

And how do you minimized the using of code mixing

Participant

Yes to minimized we more practice because practice makes us perfect and also ee we also should ee what is do our presentation first before we go to to to tell in front of our class

Researcher

So do you have any solution to decrease the using of code mixing when a presentation?

Participant

My solution Is before you must be ready before you go to presentation to make presentation in front of your class practice as much as possible I think its my solution thank you.
