Chapter V

Conclusions and Suggestions

This chapter provides the information on how the overall summery or conclusion of this research is presented. This chapter covers up two sub topics, those are conclusion and the suggestion in its relation to the students' difficulties in conducting thesis research.

Conclusions

Based on the description in findings and discussions about students' difficulties in conducting thesis, therefore, it can be concluded that there are seven main factors deals with the students' difficulties in conducting thesis research, those are Thos are Difficulty in determining the topic of the thesis, Insufficient knowledge in writing thesis, Anxiety in interacting with the thesis advisors, Limited access to interact with the lecturers, limited access to the availability of the books as the relevance of their study, Students want friendship and expansion with their advisors, and Students expect the joy and excitement that comes with creative work.

From the interviews with the three students of English Department Study program Universitas Negeri Gorontalo, it is found that all students or participants believe that the main problems that they face during the thesis conduction is that the limitation of time and the relationship between the lecturers and the students themselves. The result of the data findings and discussion also found out the most common barrier or obstacles/difficulties encountered by the students in conducted their research is that

the limited access to the books and important journals which are provided in the library or book stores in Gorontalo. Therefore, it can be concluded that all of the students have been expected to be more comfortable with their thesis advisors and to have more flexibility in communicating with their own thesis advisors.

Suggestions

Based on the data findings and discussion, it revealed that the students as the respondents pose a problem towards the thesis conduction. The problem that they face is that the limited access and availability of books and important journal in English department library that they are difficult to obtain important data for their research. Thus, it is suggested that the entire educational stakeholder in the university and English Department study program need to do any improvement to the facilities provided in the library by adding some new books for the students' references. By providing some required facilities, it will not only help the students in acquiring the research material to the students but also it will help the students to be well improved in terms of their English skills and ability and also their acknowledgement to the research development field. And for additional, students also could make a well communication with their thesis advisor and the examiner. Because well communication could help the students conduct the thesis with ease.
