

CHAPTER V

CONCLUSSION AND SUGGESTION

CONCLUSSION

Based on the result of this research, it can be conclude that the meaning shift used in the instagram and facebook was widening. Generally, the using of widening found in this research, the user of facebook and istagram specifically didn't understand the actual meaning of the words and they only use the words as the term, the famous terms that usually used by many user or instagram.

The use of widening by facebook and instagram user in order to express their feeling and condition that they faced at the day. In fact, the use of word in their status was not refers to the rules or the rule and principle of the words or sentence itself.

It can be conclude that, the user of facebook and instagram didn't know that their status or caption have made a meaning shift namely widening. They only use the words in order to express their feeling and not have the other purpose.

SUGGESTION

It can be suggested to the facebook and instagram user to use the words or sentence by attention to the rule or the norm of using language, especially care to the meaning shift. Because it is interesting to make a status or caption in a deep meaning and the other user of facebook and instagram can understand what is the

meaning of the statement that they have been stated in their facebook and instagram.

It can be suggested to next English department student to do another research on facebook and instagram but in different material of semantic in another to support this result of research.
