

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents conclusions which derived from the study and suggestion intended for the teacher, the students and the researcher

Conclusion

The conclusion of this research is given based on the research finding and discussion. The conclusion is presented as follows:

Firstly, the hypothesis of this research is received because the result of research show that $t_{\text{count}} - 12,61 \leq t_{\text{list}} 2,0$, based on the criteria of hypothesis if t_{count} less than t_{list} it means that the hypothesis of research is received. Secondly, the hypothesis

of this research was received. It means that the use of SQ5R can improve the students reading comprehension, students at eight grade of SMPN 4

Kotamobagu. Thirdly, based on the calculation of pre-test data, it was found that the students' ability was low, but in fact that in post-test the students' score was improved. Fourthly, based on the fact on learning process, as long the learning process the students were active in joining the learning activity. The interaction among the students and the students with the teacher was happened as long the learning process.

Suggestions

Based on the conclusion above, there are some suggestions by using this technique ;

First, for the students, it is suggested that the students have to learn more intensively in order to improve the other skill of English learning and they should be more creative to find the easiest way in learning English based on their ability.

The second, for the teacher, it is suggested to have or to learn about how choosing the method in teaching English. They must be creative to use various technique in teaching reading, so the students are interested and actively involved in teaching and learning process. The teacher should be learn how to establish a good atmosphere in the class. So that the students feel comfortable in their class.

The last, for the researchers, the writer used SQ5R technique in teaching Reading Narrative Text. Hopefully, for the next researcher, it is expected that the data and the result of this research be the based information in order to do the next research and choosing new or another method. In addition, the method SQ5R can be used in reading comprehension, it can be suggested to the next researcher to use this method on another English subject.
