ABSTRAK

Rivaldi Niode. 2018. *Perilaku peternak terhadap program bantuan sapi pemerintah Di Kecamatan Suwawa*. Skripsi. Jurusan Peternakan. Universitas Negeri Gorontalo. Di bimbing oleh Fahria Datau sebagai pembimbing utama dan Suparmin Fathan sebagai pembimbing anggota.

Penelitian ini bertujuan untuk mengetahui sikap dan hubungan karakteristik peternak terhadap program sapi bantuan, serta kendala-kendala yang dihadapi oleh peternak di Kabupaten Bone Bolango. Metode pengambilan sampel (responden) dalam penelitian dilakukan secara *Total sampling* adalah teknik pengambilan sampel dimana jumlah sampel sama dengan populasi. Hasil penelitian menunjukkan bahwa rata-rata presentase umur peternak berkisar 15-55 tahun dan < 55 tahun berkisar 95,3% - 4,7%. Rata-rata presentase peternak dengan tingkat pendidikan SD, SMP, dan SMA berkisar 50,6%, 35,3% dan 14,1%. Rata-rata presentase pengalaman beternak 0-5 tahun, 6-10 tahun, 11-15 tahun, dan lebih dari 15 tahun berkisar 45,9%, 38,8%, 8,2% dan 7,1%. Rata-rata persentase perilaku peternak terhadap sapi bantuan berkisar 18,5% - 20,7%. Rata-rata persentase sikap peternak berkisar 14,13% - 14,60%. Rata-rata presentase peternak terhadap program sapi bantuan 14,1% - 14,7%. Rata-rata total persentase perilaku peternak terhadap program sapi bantuan dengan presentase tertinggi adalah 27%, sikap peternak sebesar 37% dan pengetahuan 36%. kesimpulan karakteristik responden dilihat dari umur sebanyak 95,3 % termasuk dalam kategori produktif. Pendidikan sebesar 50,6% tamatan SD dengan kategori berpendidikan rendah. Pengalaman beternak 0 – 5 tahun sebanyak 39 orang dengan presentase 45,9% menunjukkan sebagian besar peternak sudah cukup lama beternak dan mempunyai pengetahuan. penerimaan program sapi bantuan dipengaruhi oleh sikap sikap sebesar 37%, pengetahuan sebesar 36% serta perilaku 27%.

ABSTRACT

Rivaldi Niode. 2018. *The Behavior of Farmers on Government Cattle Aid Program in Suwawa Sub-district*. Skripsi. Department of Animal Science. State University of Gorontalo. The principal supervisor is Fahria Datau, and the co-supervisor is Suparmin Fathan.

The research aimed to investigate the attitude and relationship of farmers characteristic on cattle aid program and obstacles encountered by farmers in Bone Bolango District. Research samples (respondents) were determined through applying Total Sampling, a technique where a number of samples are the same with the population. Research finding revealed that the average percentage of farmers' age for about 15-55 years and <55 years was 95,3% - 4,7%. Then, the average percentage of farmers having SD (Elementary School), SMP (Junior High School), and SMA (Senior High School) education level was about 50,6%, 35,3%, and 14,1% respectively. Next, the average percentage of breeding experiences for 0-5 years, 6-10 years, 11-15 years, and more than 15 years were 45,9%, 38,8%, 8,2%, and 7,1% respectively. The average percentage of farmers behavior on cattle aid was 18,5% - 20,7%, average percentage of breeding behavior was about 14,13% - 14,60%, average percentage on cattle aid program was 14,1% - 14,7%. The total average percentage of farmers behavior on cattle aid program with the highest percentage was 27%, farmers attitude was 37%, and knowledge was 36%. In conclusion, the characteristic of respondents based on age was 95,3% or classified as a productive category. Based on the education level, those graduated from SD was 50,6% or classified as a low educated category. Breeding experience for 0 - 5 years owned by 39 people with the percentage of 45,9% showed that most farmers have been quite long in breeding and having knowledge of it. The acceptance of cattle aid was affected by attitude for 37%, knowledge for 36%, and behavior for 27%.
