

BAB V

PENUTUP

5.1 Kesimpulan

Berdasarkan hasil dan pembahasan dapat disimpulkan bahwa, penambahan bobot badan tertinggi ada pada perlakuan P5 (warna biru) yakni rata-rata 61,53125 gr/ekor/minggu, konsumsi ayam kampung super tertinggi ada pada perlakuan P5 (warna biru) yakni rata-rata 14,215 gr/ekor/hari. Sedangkan efisiensi ransum terbaik (terendah) juga ada pada perlakuan P5 (warna biru) yakni rata-rata 4,15.

5.2 Saran

Perlu adanya penelitian lanjutan tentang uji kandungan nutrisi daging ayam kampung super yang di beri warna cahaya yang berbeda.
