## ABSTRAK

**HARYANTI BUHANG. 2020. Pengaruh Bermain Menganyam Terhadap Kemampuan Motorik Halus Anak Kelompok A di RA Almourky Kecamatan Telaga Kabupaten Gorontalo.** Skripsi, Jurusan Pendidikan Guru Pendidikan Anak Usia Dini Fakultas Ilmu Pendidikan Universitas Negeri Gorontalo. Pembimbing I: Dra. Rapi Us Djuko, M.Pd, Pembimbing II: Icam Sutisna, S.Pd, M.Pd.

Penelitian ini bertujuan untuk memperoleh data empirik tentang Pengaruh Bermain Menganyam Terhadap Kemampuan Motorik Halus Anak Kelompok A di RA Almourky Kecamatan Telaga Kabupaten Gorontalo. Metode yang digunakan dalam penelitian ini yaitu kuantitatif eksperimen dengan desain *pre-experimental (one group pre-test dan post-test design)*. Teknik pengumpulan data yang digunakan yaitu *test performance*. Berdasarkan hasil penelitian dengan sampel 30 anak, menunjukkan adanya peningkatan besaran rata-rata hasil *pretest* dan *posttest*. Dapat dibuktikan dengan jumlah nilai rata-rata *pretest* = 35,53 sedangkan nilai rata-rata *posttest* = 58,26. Hasil tersebut membuktikan perbedaan yang signifikan sebelum dan sesudah pemberian perlakuan. Berdasarkan uji t-test menggunakan rumus *related berpasangan* diperoleh hasil uji signifikan diperoleh nilai  $t_{hitung} = 17,8$  sedangkan nilai  $t_{tabel}$  pada  $(\alpha) = 0,05$  yakni sebesar 1,697. Jadi  $t_{hitung} > t_{tabel}$  atau  $17,8 > 1,697$  atau dengan kata lain  $t_{hitung} > t_{tabel}$  maka  $H_0$  ditolak atau  $H_a$  diterima artinya ada pengaruh Antara Bermain Menganyam Terhadap Kemampuan Motorik Halus Anak Kelompok A di RA Almourky Kecamatan Telaga Kabupaten Gorontalo.

**Kata kunci:** Anak, Motorik, Bermain, Menganyam

## ABSTRACT

**HARYANTI BUHANG, 2020.** The Influence of Playing Webbing towards Fine Motor Skills of Students Group A at RA (*Raudhatul Athfal*) Almourky, Telaga Subdistrict, Gorontalo District. Skripsi, Department of Early Childhood Teacher Education, Faculty of Education, State University of Gorontalo. The Principal Supervisor is Dra. Rapi Us. Djuko, M.Pd, and the Co-supervisor is Icam Sutisna, S.Pd, M.Pd.

The research aimed to obtain the empirical data regarding the Influence of Playing Webbing towards Fine Motor Skills of Students Group A at RA Almourky, Telaga Subdistrict, Gorontalo District. The method used in this research was a quantitative experiment with pre-experimental design (one group pre-test and post-test design). At the same time, the technique of data analysis employed test performance. The research finding with 30 children as the samples revealed that there was an increase in the average amount of the pretest and posttest results. It could be proven by the average value of pretest was 35,53 and the average value of the posttest was 58,26. This result proved a significant difference before and after the treatment given. Based on the t-test using a pair-related formula, it was obtained the result of the significance test showed t-count was 17,8, while the value of the t table at  $\alpha = 0,05$  was 1,697. Therefore,  $t_{count} > t_{table}$  or  $17,8 > 1,69$ , in other words, if  $t_{count} > t_{table}$  thus  $H_0$  was rejected and  $H_a$  was accepted. In conclusion, there was an Influence of Playing Webbing towards Fine Motor Skills of Students Group A at RA Almourky, Telaga Subdistrict, Gorontalo District.
