

Chapter V : Conclusion and Suggestion

In this chapter, I take some conclusion based on the result of the data analysis and description of the data in chapter IV.

Conclusion

Rhythm of Pop Music media had some advantages in learning vocabulary process:

The first advantage is the students feel enjoy and not feel bored during the class, because the researcher use one media that can make them interested in learning English. Second, by using rhythm of pop music media in learning process it can make students motivate when they memorize vocabulary. Third, this media can organize the teacher way in explain more about vocabulary to student. Then, this media can make students easily to understand and memorize more of vocabulary. Also, the students can use their vocabulary that they already memorize during the class in their conversation with the others even it not complete.

Based on the result of this study concludes that by using Rhythm of Pop Music media, students' could memorized vocabulary based on the material in descriptive text. If compared before students' used this media in memorized vocabulary, students' have lack knowledge of vocabulary. Thus, when the students' used rhythm of pop music in memorized vocabulary as the media of learning their vocabulary is added and improved.

From the analysis of this study there is the different between the result before and after the writer applied the treatment by using rhythm of pop music. The result based on the analysis of testing hypothesis that is t_{count} was bigger than t_{list} . Therefore, by teaching English subject using Rhythm of Pop Music as the media of learning could be attract the students interest to learning English, making a positive effect on learning, and increase students' vocabulary easily.

Suggestion

From this study, First I hoped the English teacher can used Rhythm of Pop Music as the media of learning to helped students' to provoked their memory about vocabularies. Beside of that, this media also is one of the easiest media and simple. Students' can learned in fun and easiest way. Therefore, teacher will be easier to teach them.

Second, for the next researchers I hoped it can be their reference to uses this media for their study but in different topic. Maybe for the next researcher can use another rhythm of music, and can compared the result by using two group of class.
