ABSTRAK

Dama, Dewi Sartika. 2021. *Pengaruh Model Integratif Terhadap Kemampuan Menganalisis Teks Soal Muatan Pelajaran IPA Di Kelas V SDN 7 Biluhu.* Skripsi. Jurusan Pendidikan Guru Sekolah Dasar, Fakultas Ilmu Pendidikan, Universitas Negeri Gorontalo. Pembimbing I Prof. Dr. Abdul Haris Panai.,M.Pd dan Pembimbing II Dr. Isnanto, S.Pd., M.Ed.

Rumusan masalah pada penelitian ini adalah “Apakah terdapat pengaruh penggunaan model *integratif terhadap kemampuan menganalisis teks soal muatan pelajaran IPA di Kelas V SDN 7 Biluhu?*” Penelitian ini bertujuan untuk mengetahui pengaruh model integratif terhadap kemampuan menganalisis teks soal muatan pelajaran IPA di kelas V SDN 7 Biluhu. Jenis penelitian ini penelitian kuantitatif dengan Desain pre Eksperimental, One Group Pretest-postes *Design*. Populasi dalam penelitian adalah seluruh siswa di SDN 7 Biluhu, sampel yaitu 14 siswa kelas V. Teknik pengumpulan data menggunakan lembar tes pretest posttest. Pengujian hipotesis dilakukan dengan menggunakan uji *t* dengan analisis menggunakan program statistic SPSS.

Berdasarkan hasil penelitian, dari hasil rata-rata skor pre test-post test mengalami peningkatan yaitu dari 45,64 menjadi 53,57. Hal tersebut menunjukkan pengaruh penggunaan model pembelajaran integrative bertanda positif dan signifikan terhadap kemampuan menganalisis teks soal muatan pelajaran IPA materi perubahan kalor di kelas V SDN 07 Biluhu. Berdasarkan hasil uji hipotesis diperoleh nilai probabilitas $0,0000 < \alpha 0,05$, sehingga H_a diterima, artinya bahwa terdapat pengaruh model *integratif* terhadap kemampuan menganalisis teks soal muatan pelajaran IPA materi perubahan kalor kelas V di SDN 7 Biluhu.

Kata Kunci: *Model integratif, Kemampuan Menganalisis, Pembelajaran IPA.*

ABSTRACT

Dama, Dewi Sartika. 2021. *The Effect of The Use of The Integrative Model on the Ability to Analyze the Natural Science Lesson Content Test in The 5th Grade of the State Elementary School (SDN) 7 Biluhu.* Undergraduate Thesis. Department of Elementary Teacher Education, Faculty of Education, State University of Gorontalo. The principal supervisor is Prof. Dr. Abdul Haris Panai, M.Pd. and the co-supervisor is Dr. Isnanto, S.Pd., M.Ed.

The inquiry formulated in this present research was “Is there any effect of the use of the integrative model upon the capability of analyzing the lesson content test of Natural Science (NS hereafter) subject in the 5th grade of SDN 7 Biluhu?” The present study was sought to examine this stated research question. This study applied quantitative tradition in the pre-experimental design format with One Group Pre-Tess–Post-Test Design. The population in this study had been all students at SDN 7 Biluhu, in which a total of 14 students in the 5th grade were chosen as the research sample. The data collection technique was carried out via administering a pre-test and post-test. Hypothesis testing was performed by employing a *t*-test, with the analysis utilizing the SPSS software program.

Rested on the results of this study, it was found that the average result of the pre-test post-test score increased from 45.64 to 53.57. Such findings signified that the use of the integrative learning model contributed a positive and significant impact on the ability to analyze the NS lesson content test in the 5th grade of SDN 7 Biluhu with particular reference of lesson to Heat Change. Growing out of the hypothesis test result, it was disclosed that the probability value 0.0000 was below the α 0.05 (p value $0.0000 < \alpha$ 0.05); hence H_0 was accepted, meaning that there was an influence of the integrative model on the ability to analyze the NS lesson content test of Heat Change in the 5th grade of SDN 7 Biluhu.

Keywords: *Integrative Model, Analyzing Ability Science Learning.*
