

## Chapter 5: Conclusion and Suggestion

This chapter presents two sections which are the conclusion and suggestion. First, the conclusion provides a summary of the research findings. Next, the suggestion presented for readers, English language lectures, pragmatics or sarcasm enthusiast, and last but not least, this research also presented for future researchers.

### Conclusion

This research was directed to find the sarcasm in the movie titled *Joker*. Based on the research findings and discussion in the prior chapter, there are sixteen sarcasm utterances that have been chosen by the researcher as the data to be analyzed. The researcher has found sixteen data which it then categorized for sarcasm purposes. Those sarcasm were successfully uttered by characters in the movie entitled *Joker* yet unfortunately, among those selected data, there are only a few categories of sarcasm purposes were found in the sixteen sarcastic remarks in the two hours long movie. Attardo's theory has been applied in this research in order to discover the purposes of sarcasm.

Furthermore, the most prominent kind of sarcasm purposes uttered by characters in the movie was sophistication, it is because of during the conversation people generally put humorous effect on it to color their sentence and additionally people love to be in game with words. Sarcasm in types of sophistication itself has a strong connection with the movie *Joker* since the movie contained of daily conversation which is related to real life, which depicted that people often preferred to hide their true intention by language fiddling.

### **Suggestions**

Based on the conclusions above, the researcher proposes some suggestions to the following parties.

1. To Students

There are many researchers who conduct research in pragmatics, yet only a few of them take sarcasm as their topic. In fact, learning about sarcasm brings so many advantages, such as for the researcher and the reader. Therefore, the researcher suggests that more students conduct researches that discuss sarcasm that is viewed pragmatically.

2. To Future Researchers

Sufficient data are important in research. A researcher should determine the object of the research in order to answer her/his research problems. In this research, *The Joker* provides sufficient data that can answer and explain the research problems. Thus, the future researchers who want to investigate sarcasm would also carefully choose the object of the research, because not all of the movie will provide the sufficient data. Other resources such as novel, magazine, newspaper, platform of social media and even comic can be used as a topic to conduct as research as well.
