

## **BAB V**

### **KESIMPULAN DAN SARAN**

#### **5.1 Kesimpulan**

1. Konsentrasi  $\text{KNO}_3$  tidak berpengaruh nyata terhadap pematahan dormansi benih palem ekor tupai.
2. Lama perendaman  $\text{KNO}_3$  tidak berpengaruh nyata terhadap pematahan dormansi benih ekor tupai.
3. Tidak terdapat interaksi antara konsentrasi dan lama perendaman  $\text{KNO}_3$  terhadap pematahan dormansi benih palem ekor tupai.

#### **5.2 Saran**

Metode perlakuan awal seperti skarifikasi diperlukan untuk mematahkan dormansi benih palem ekor tupai. Perlu penelitian lanjutan mengenai konsentrasi dan lama perendaman  $\text{KNO}_3$  dengan variasi yang berbeda untuk mengetahui pematahan dormansi benih palem ekor tupai.
