Rumusan masalah dalam penelitian ini adalah “Apakah kemampuan siswa dalam mengidentifikasi sifat-sifat bangun datar dapat ditingkatkan melalui model pembelajaran kooperatif tipe *Teams Games And Tournament (TGT)* pada siswa kelas V SDN 6 Suwawa Tengah?”. Tujuan penelitian ini adalah untuk meningkatkan kemampuan mengidentifikasi sifat-sifat bangun datar melalui model pembelajaran kooperatif tipe *Teams Games And Tournament (TGT)* pada siswa kelas V SDN 6 Suwawa Tengah Kota Gorontalo. Penelitian tindakan kelas dilaksanakan melalui 2 siklus, dengan tujuan mendeskripsikan gambaran kemampuan mengidentifikasi sifat-sifat bangun datar melalui model pembelajaran kooperatif tipe *Teams Games And Tournament (TGT)* pada siswa kelas V SDN 6 Suwawa Tengah Kota Gorontalo.

Hasil penelitian menunjukkan pada siklus I, dari 20 siswa, diperoleh 9 siswa mampu mengidentifikasi sifat-sifat bangun datar atau 45% siswa memperoleh nilai minimal 70 ke atas dan 11 siswa dinyatakan belum mampu mengidentifikasi sifat-sifat bangun datar atau 55% siswa memperoleh nilai di bawah 70. Hal ini belum sesuai dengan indicator kinerja yang telah ditetapkan sehingga dilanjutkan pada siklus ke II. Pada siklus II, diperoleh 19 siswa mampu mengidentifikasi sifat-sifat bangun datar atau 95% siswa memperoleh nilai 70 ke atas, dan 1 siswa dinyatakan belum mampu mengidentifikasi sifat-sifat bangun datar atau 5% siswa memperoleh nilai di bawah 70.

Dengan demikian disimpulkan bahwa melalui model pembelajaran kooperatif tipe *Teams Game Tournament (TGT)* kemampuan mengidentifikasi sifat-sifat bangun datar meningkat.

ABSTRACT

Mansur A. Paneo. 2014 Improving the Capability of Identifying properties Build Flat Through Cooperative Learning Model Type Teams Games Tournament (TGT) in Class V Elementary School District 6 Middle Suwawa Bone Bolango. Thesis S-1 Jurusan Elementary Teacher Education Faculty of Education, State University of Gorontalo. Advisor I Prof. Dr. Dj H W. Sarson. Pomalato, M. Pd and Advisor II Dra. Martianty Nalole, M.Pd.

The problem of this study is "What is the ability of students to identify the properties of a flat wake can be enhanced through cooperative learning model And Teams Games Tournament (TGT) to the fifth grade students of SDN 6 Middle Suwawa?". The purpose of this research is to improve the ability to identify the properties of flat wake through cooperative learning model And Teams Games Tournament (TGT) to the fifth grade students of SDN 6 Middle Suwawa Gorontalo city. Action research conducted through two cycles, with an overview describing the purpose of the ability to identify the properties of flat wake through cooperative learning model And Teams Games Tournament (TGT) to the fifth grade students of SDN 6 Middle Suwawa Gorontalo City.

The results showed in the first cycle, of 20 students, gained 9 students were able to identify the properties of a flat wake or 45% of students received grades of at least 70 to 11 students stated above and have not been able to identify the properties of a flat wake or 55% of students received grades in under 70 this is not in accordance with the established performance indicators that continued on into the second cycle. In the second cycle, gained 19 students were able to identify the properties of a flat wake or 95% of students scored above 70, and 1 student otherwise not been able to identify the properties of a flat wake or 5% of students received grades below 70.

Thus concluded that through cooperative learning model Teams Games Tournament (TGT) the ability to identify the properties of flat wake increased.
