

## ABSTRACT

Ni Made Rai Pradnyandari,. 2014. The Effect of “Talking Futsal Game” to Improve Students Ability in Mastering the Expression of Command and Prohibition (a research was conducted at class VIII c of SMPN 1 Randangan.

The purpose of this research is to find out whether or not “Talking Futsal Game” can improve students’ ability in mastering the expression of command and prohibition. This research is conducted by pre-experiment design with the type of one pre-test post-test design. The example of this research is taken by purposive sampling technique while the sample of this research is the students at class VIII c. The result of the research shows that the students learning outcome significantly increase. It is proven by the differences between average score of students’ pre-test and post-test ( $\bar{X}_1 = 11.071 : \bar{X}_2 = 15.46$ ). The result of t-test at  $\alpha = 0.05$  was found that  $t_{\text{count}} > t_{\text{table}}$  with the calculation  $6.99 > 2.05$ . Therefore, it was clear that “Talking Futsal Game” could improve students’ ability in mastering the expression of command- prohibition and the hypothesis of this research was accepted.

**Keywords:** Command and Prohibition, Talking Futsal Game.
