

Chapter V

Conclusion and Suggestion

Conclusion

Based on the research finding and discussion of the data, then this research conclusion is as follow:

- a) There were significant differences between students score in pre-test and post-test. It was proven by: (1) The average score of students pretest was $(\bar{X}_1) = 11.071$ and the students average score of post-test was $(\bar{X}_2) = 15.464$. (2) Number of students who got low score became decrease in the post-test. There were 8 students who got lowest score with the frequency relative = 28,57% while in post-test the students who obtained low score were 2 with the frequency relative of 7.14. (3) The result of $t_{count} = 6.99$ was higher than $t_{table} = 2.05$.
- b) “Talking futsal game” could improve students’ ability in mastering the expression of command and prohibition. This result shows that the hypothesis (H_1) of this research was accepted and the H_0 was rejected.

Suggestion

Based on the result and the conclusions of this research, the researcher gives some suggestions: To improve the quality of the learners better, the school should be able to enhance the knowledge of the teachers as educators by giving training, seminar and workshop of teaching technique.

In teaching learning process the teachers should not focus on one learning technique only, but they should find new and various learning technique. The application of various learning technique, can make the students happy to learn English. Automatically, their learning outcomes will also increase. Therefore, it is suggested to implement the “talking futsal game” to improve students' ability in mastering the expression of command and prohibition.

This study also suggest to the reader to look for other sources outside the class because not all of information can be obtained in the formal education.
