## ABSTRAK

**Herlina Ishak Bagu. 2022. Hubungan status pernikahan dengan kualitas kehidupan kerja perawat di RSUD DR. MM. Dunda Limboto Kabupaten Gorontalo. Skripsi, Program Studi Ilmu Keperawatan, Fakultas Olahraga dan Kesehatan, Universitas Negeri Gorontalo. Pembimbing I Ns. Wirda Y. Dulahu, M.Kep dan Pembimbing II Ns. Dewi Suryaningsi Hiola, M.Kep.**

Kualitas kehidupan kerja perawat tentunya dapat menentukan kualitas pelayanan keperawatan di Rumah Sakit dan salah satu faktor demografi yang mempengaruhi adalah status pernikahan. Penelitian ini bertujuan mengetahui hubungan antara status pernikahan dengan kualitas kehidupan kerja perawat di RSUD DR. MM. Dunda Limboto Kabupaten Gorontalo. Penelitian ini adalah penelitian deskriptif analitik. Sampel sebanyak 161 responden ditentukan dengan teknik *Stratified Random Sampling*.

Hasil penelitian menunjukkan bahwa dari 161 responden, yang sudah menikah sebanyak 104 responden (81,9%) yang kualitas kehidupannya baik, 22 responden (17,3%) cukup dan 1 responden (0,8%) kurang. Sedangkan responden yang belum menikah sebanyak 20 responden (58,8%) kualitas kehidupannya dalam kategori baik, 3 responden (8,8%) cukup, dan 11 responden (32,4%) kurang. Hasil uji *Chi Square* pada penelitian ini didapatkan *p-value* : 0,000 ( $p < 0,05$ ) yang artinya ada hubungan antara status pernikahan dengan kualitas kehidupan kerja perawat di RSUD DR. MM. Dunda Limboto Kabupaten Gorontalo.

Kesimpulan status pernikahan berpengaruh terhadap kualitas kehidupan kerja perawat. Saran untuk meningkatkan kualitas kehidupan kerja perawat, pimpinan rutin memberikan motivasi, semangat dan etos kerja yang akan berdampak pada peningkatan kualitas pelayanan rumah sakit yang tentunya meningkatkan mutu rumah sakit.

## ABSTRACT

Herlina Ishak Bagu. 2022. The relationship between marital status and the quality of work life of nurses in Regional Public Hospital DR. MM. Dunda Limboto, Gorontalo Regency. Thesis, Nursing Science Study Program, Faculty of Sports and Health, State University of Gorontalo. The principal supervisor is Ns. Wirda Y. Dulahu, M.Kep and the co-supervisor is Ns. Dewi Suryaningsi Hiola, M.Kep.

The quality of work life of nurses can determine the quality of nursing services in hospitals, and one of the demographic factors influencing it is marital status. This study aims to figure out the relationship between marital status and the quality of work life of nurses in Regional Public Hospital DR. MM. Dunda Limboto, Gorontalo Regency. This research is descriptive analytical research. A sample of 161 respondents was established by the Stratified Random Sampling technique.

The results show that from 161 respondents, 127 respondents are married and 34 respondents are not married. From the married respondents, there are 104 (81.9%) who have good quality of work life, 22 respondents (17.3%) have sufficient quality and 1 respondent (0.8%) has poor quality. Whereas for respondents who are not married, there are 20 respondents (58.8%) whose quality of work life is good, 3 respondents (8.8%) are sufficient, and 11 respondents (32.4%) are poor. The results of the *Chi square* test in this study obtained p-value: 0.000 ( $p < 0.05$ ), which means that there is a relationship between marital status and the quality of work life of nurses in Regional Public Hospital DR. MM. Dunda Limboto, Gorontalo Regency.

In conclusion, marital status has an impact on the quality of nurses' work life. Furthermore, based on this study, there are some recommendations that can be suggested to improve the quality of the working life of nurses. Firstly, there should be a routine motivation speech from the chiefs. Secondly, the nurses should have enthusiasm and work ethic, which will improve the quality of hospital services which certainly enhance the quality of hospitals.
